

SPOPS®

SPOPS® is a new replacement container developed by Nippon Paper Industries to replace refill pouches used for cosmetics and daily necessities.

It allows for easy refilling simply by replacing the paper pack like a cartridge, without having to pour in any contents.

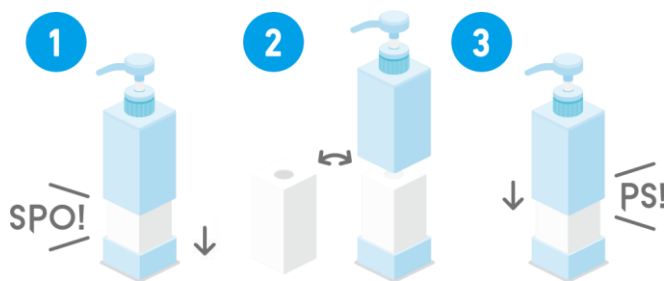

SPOPS® is a product that improves ease of use for customers by reducing the time required for refilling, minimizing liquid residue, and allowing for compact storage. It also contributes to environmental protection by reducing single-use plastics and improving packaging and transportation efficiency.

Contribution to Achieving SDGs through Products

- ● A plant-derived biomass material with low environmental impact related to production and disposal, developed by maximizing the use of various technologies and know-how
- Contributes to reducing GHG emissions by reducing packing volume (improving transportation efficiency)
- Contributes to reducing marine plastic litter
- Uses cellulose obtained from sustainably managed forests

How to use SPOPS®

- 1 Remove the bottom part.
- 2 Replace the paper pack.
- 3 Return the body.

Commercialized Case

Work Skin (hand sanitizer)
