

SPOPS®

SPOPS® is a new replacement container developed by Nippon Paper Industries to replace refillable pouches used for cosmetics and daily necessities.

Replenishment is completed simply by replacing the pre-filled cartridge, without handling the contents.

SPOPS® has improved ease of use for customers, shortening the time required for refilling. Its stable shape retains little liquid residue and enables compact storage. It is an environmentally friendly product.

Contribution to Achieving SDGs through Products

- ● A plant-derived biomass material with low environmental impact related to production and disposal, developed by maximizing the use of various technologies and know-how
- Contributes to reducing GHG emissions by reducing packing volume (improving transportation efficiency)
- Contributes to reducing marine plastic litter
- Uses cellulose obtained from sustainably managed forests

How to use SPOPS®

- ① Remove the bottom part.
- ② Replace the paper pack.
- ③ Return the body.

Commercialized Case

Work Skin (hand sanitizer)
