

Genki Morimori®

Genki Morimori® is cattle feed made from wood.

It is characterized by stable quality and high digestibility because it uses only high-purity, high-quality cellulose extracted from wood by delignification. In addition, by using domestic wood and manufacturing in a domestic factory, stable supply is possible.

Contribution to Achieving SDGs through Products

- Contributes to a stable food supply by maintaining the health of cattle
- Contributes to the sustainable development of livestock farming with products that make effective use of wood resources
- Uses cellulose obtained from sustainably managed forests
- Promoting the development of applications through partnerships with users
