

## Lamina®

Lamina® is a heat-sealable paper that can be used for packaging without using plastic or lamination.

It is a recyclable product and can be used in a wide range of applications, such as secondary packaging for foods that do not require barrier properties, daily necessities, and miscellaneous goods.

### Contribution to Achieving SDGs through Products

- ● ● A plant-derived biomass material with low environmental impact related to production and disposal, developed by maximizing the use of various technologies and know-how
- Contributes to reducing marine plastic litter
- Uses cellulose obtained from sustainably managed forests

### Adoption Example

#### Macrobiotic Beauty Paste

ALL is GOOD

#### Sasa-kamaboko (fish cake)

Awanokamaboko
