  - Niigata Mill
  - Kyoto Mill
  - Kyushu Mill
  - Akita Jujo Chemicals Co., Ltd.
  - Head Office Plant

Wood Products and Construction Related Business
- Nippon Paper Lumber Co., Ltd.
  - N&E Co., Ltd.
- Daishowa Uniboard Co., Ltd.
- Miyagi Mill

* In an organizational restructuring implemented in June 2017, the Paper-Pak Division became the Paper-Pak Sales Division, and the Chemical Division became the Chemical Sales Division. The Gotsu Mill, which was part of the Chemical Division, was made into its own organizational unit. The Iwakuni Mill, which was also part of the Chemical Division, was consolidated with the pulp and paper business’s Iwakuni Mill.
Editorial Policy

The Nippon Paper Group publishes its sustainability report to provide stakeholders with a broad overview of what we are doing to meet our corporate social responsibilities (CSR). The Group also publishes an annual report to provide information on its financial aspects and results of operations.

This report was prepared in accordance with the core option of the fourth update of the GRI Sustainability Reporting Guidelines (G4).

Period Covered

Fiscal 2016: April 1, 2016–March 31, 2017
Includes information from before April 1, 2016 and after March 31, 2017. Dates are indicated in such cases.

Scope of Organizations Covered

The reporting entity is Nippon Paper Industries Co., Ltd. Data, however, were compiled as of March 31, 2017 for Nippon Paper Industries Co., Ltd. and all 42 of its consolidated subsidiaries.

Scope of Environmental Coverage

The scope of the report covers the basic environmental policies, systems, environmental accounting and environment performance and other data for the 20 companies, including 5 non-consolidated subsidiaries with production facilities, named below. All major production locations are included.

(Sales data for trading companies that are members of the Nippon Paper Group and sell products made by the Group to outside buyers are included.)
Non-consolidated: SOKA PAPERPAK CO., LTD.; EGAWA PAPERPAK CO., LTD.; MIKI PAPERPAK CO., LTD.; ISHIOKA KAKO CO., LTD.; Akita Jujo Chemicals Co., Ltd.

Referenced Guidelines

• Environmental Reporting Guidelines (2012) of the Ministry of the Environment
• Sustainability Reporting Guidelines (Version 4) issued by the Global Reporting Initiative (GRI)
• United Nations Global Compact
• ISO 26000, etc.
* Information on performance relative to guidelines is available at the following URL: http://www.nipponpapergroup.com/english/csr/gri/

Disclaimer

This report includes not only statements of fact and historical data but also plans, forecasts and estimates (forward-looking statements) based on the business plans and policies of the Nippon Paper Group. These forward-looking statements are the result of assumptions or judgments based on currently available information as this report was prepared. It should be noted that forward-looking statements may differ significantly from actual results due to the impacts of a number of important factors.

Outline of the Nippon Paper Group ............................................... 66
Third-Party Comments / Action in Response to Third-Party Comments ............................................... 67
As a comprehensive biomass company shaping the future with trees, the Nippon Paper Group will contribute to the building of a sustainable society by utilizing the diverse qualities of wood, a renewable resource, to swiftly grow a broad array of businesses.

The Nippon Paper Group will build on its sustainable business model and continue to be a company that is indispensable to society.

Through its sustainable stewardship of renewable forests, the Nippon Paper Group is sequestering CO2s in trees and helping to protect ecosystems and biodiversity. By effectively applying every bit of the abundance of biomass resources forests produce, we are also helping to slow the depletion of fossil fuels and lower the environmental impact of their use. Furthermore, we are a leader on the recycling front, using recycled content for 38% of the raw material for our paper and 89% of the raw material for our paperboard.

With its sustainable business model, the Nippon Paper Group aims to engage in business activities that consider the impacts on and needs of stakeholders while contributing to the sustainability of society. By swiftly developing businesses along these lines to achieve long-term growth, the Nippon Paper Group will continue to be a company that is indispensable to society.

By uncovering and developing new fields, we are helping to enrich daily life and culture.

Business structure transformation is one of the key themes of our Fifth Medium-Term Business Plan, covering the period April 1, 2015 to March 31, 2018. In 2016, therefore, we concentrated on reallocating and using assets more effectively and strengthening the profitability of our domestic and overseas paper and paperboard businesses, while also developing businesses in growth areas and enhancing the profitability of new businesses.

In industrial paper, an existing business area, we furthered our production and sales business alliance with Tokushu Tokai Paper Co., Ltd., creating Nippon Tokai Industrial Paper Supply Co., Ltd. In the packaging business, we established a new internal organization to strengthen product development and R&D. Overseas, we acquired a liquid packaging board business from a North American company and concluded a license agreement with a Norwegian company regarding gable-top liquid packaging that can accommodate closures. In the area of healthcare, we concluded an agreement with Kasuga Paper Industry Co., Ltd. to create a joint venture for household paper products. In 2017, we will commence operation of a demonstration facility for using torrefaction technology to produce woody biomass fuel in a new business undertaking in Thailand. In addition, we have already established one of the world’s largest high-capacity production facilities for cellulose nanofiber (CNF), at the Ishinomaki Mill; a kneading facility for combining CNF and plastic, at the Fuji Mill; and high-capacity production facilities for food and cosmetics products at the Gotsu Mill. Regarding CNF, we have established an organization for performing R&D, application development, and marketing activities, and aim to achieve rapid progress in this business by making the most of our new CNF facilities to develop a wide range of applications for this material and market it to other companies.

Going forward, we will draw on the advanced wood-application technologies we have cultivated in our papermaking business and on our wealth of woody biomass resources to rapidly develop new products that consumers will find indispensable for daily life.

We aim to thoroughly understand impacts on all of our stakeholders and to achieve sustainable development for society and the Nippon Paper Group.

I believe paying attention to local environmental needs and maintaining safe operations are critical to fulfilling our responsibilities as a manufacturer, and what enable us to be a part of the communities where we operate. We, therefore, devote significant time and attention to communicating with communities, customers, and other stakeholders to see what impacts we are having and respond to expectations and desires. In environmental matters, we reflect what we learn, and our responses to issues, in the medium-term environmental action plans that guide our environmental management. Regarding matters of safety, we make safety and health our top priorities and, based on the iron principle that no one must be injured in
our facilities, spare no effort in making work environments as safe as they can be.

In our Group Mission, we emphasize embracing new challenges, acting with fairness, and championing teamwork. Embracing new challenges means rising to the challenges of an industry characterized by dynamic change. Fairness means having a corporate culture that not only exercises fairness in our dealings with outside parties but also applies internal rules with an even hand. Championing teamwork means having individuals properly perform their respective roles to realize our Group Mission.

Nippon Paper Industries Co., Ltd. is a signatory to the United Nations Global Compact, which sets out 10 principles on human rights, labor, environment, and anti-corruption, and we, as a responsible member of society, are participating in the building of a global framework for realizing sustainable growth. In my role as a company president, I am aware that business survival requires that the challenge of realizing a sustainable society - a common issue for all of humankind - be faced head on.

This report focuses on describing how our sustainable business model, as that of a comprehensive biomass company, contributes to problem resolution and ongoing development for society, and how we will continue to pursue our business in coexistence with local communities. Taking the perspective of R&D targeting long-term value creation, it also discusses how we will achieve long-term growth and how our actions further achievement of the sustainable development goals (SDGs) adopted by the United Nations.

The Nippon Paper Group places great importance on maintaining dialogues with stakeholders and working in ways that promote the development of a sustainable society. We welcome candid feedback on how we can improve in these endeavors.

Fumio Manoshiro
President
Nippon Paper Industries, Co., Ltd.
The Nippon Paper Group uses renewable wood resources to pursue a diversity of businesses. From paper and paperboard, and household paper, to paper containers, chemicals, and housing construction materials, we provide a wide range of products indispensable for daily life.

Pulp and Paper Business

**Business Description**
Various paper, paperboard and household paper products in this core segment lead the domestic industry in production, sales volumes and quality. We are working to reorganize our production structure. At the same time, we are proactively developing overseas markets for paper and paperboard, especially in Asia and the Pacific Rim. Significant attention is also being devoted to the application of in-house power generation know-how to produce and sell electricity.

**Principal Customers**
Newspaper, publishing, printing, and stationery companies; public offices, paper manufacturers, electric utilities, and general consumers.
Paper-Related Business

Business Description
Comprising this business are three segments, including paper-processing operations, which add various forms of value to paper as a raw material; the chemical products segment, which applies all wood components fully in the manufacture and sale of various types of products; and the functional film segment, which makes the most of its clean coating technology.

Principal Customers
Manufacturers of beverages, food, chemicals and other products, and various types of paper processing companies

Chemicals
Product Examples
- Coating materials
- Food additives
- Material for LCDs
- Raw material for rayon
- Concrete dispersant

Wood Products and Construction Related Business

Business Description
The lumber segment of this business has the advantage of using Japanese timber obtained by the same expertise we use to procure wood resources for making paper. It also strives to use Japanese timber for construction materials and finished products. The civil-engineering-related segment makes use of the technologies we have amassed for maintaining facilities at our paper mills.

Principal Customers
Construction materials, housing and construction companies, general consumers, and public offices

Other Businesses

Business Description
Included here are segments that put biotechnology expertise developed in afforestation R&D to work in agricultural pursuits; apply real estate and other Group assets in sports and leisure operations; and handle product and material logistics for Group companies.

Principal Customers
Businesses and general consumers

Agriculture
Business Example
- Tea business

Sports & Leisure
Business Example
- Leisure business
The Nippon Paper Group is a comprehensive biomass company that, while sustainably managing forests, effectively uses and recycles the abundant biomass resources they produce. We practice CSR activities consistent with our business characteristics and business strategies.

Helping to fight global warming, protect biodiversity, and prevent resource depletion

1 Sustainable Forest Management

181 thousand hectares of company-owned forests worldwide

In addition to preventing global warming and protecting watersheds, forests perform a wide variety of functions such as providing shelter for diverse living creatures. After harvesting, steps such as tree planting are taken to regenerate forests and ensure that forests under our stewardship thrive indefinitely.

Preserving biodiversity
Nippon Paper Industries has designated approximately 20% of its Japanese forest as “environmental forest areas.” In these areas, logging for commercial purposes is prohibited and forest ecosystems and water resources are protected. These environmental forest areas include national park lands in Akan, Nikko, and other places as well.

Environmental forest areas:
18 thousand hectares
About 20% of forests owned in Japan

2 Carbon Neutrality
(Preventing Global Warming through the Carbon Cycle)

CO₂ sequestered in company-owned forests worldwide: 33 million tons

Trees, the principal raw material used by the Nippon Paper Group, absorb and hold CO₂ from the atmosphere as they grow. It is believed, therefore, that the release of CO₂ when wood resources are burned results in no net increase in atmospheric CO₂. The ongoing effective use of wood resources from properly managed, sustainable forests constitutes a carbon-neutral cycle that adds no carbon to the atmosphere.

Three Cycles Contributing to Sustainable Development

1 Sustainable Forest Management

CO₂ sequestered in wood

Harvesting and use

Planting

CO₂ absorption and sequestration

2 Carbon Neutrality
(Carbon Cycle)

CO₂ absorption from the growth of plants and trees

CO₂ emission from burning
Making full use of trees as a biomass resource

Cascade use of wood

While constantly building upon its wealth of wood science technologies, the Nippon Paper Group uses every harvested tree in a cascade of applications.

Prevention of resource depletion

- Of the energy used by the Nippon Paper Group, 46% is comprised of black liquor from the pulp-making process, wood construction waste and other biomass fuels, and fuels derived from discarded tires, RPF, and other waste materials.
- The Group is also making advances in the development of biomass fuel that can be used in place of fossil fuels.

Non-fossil energy* as a percent of total energy usage:

- 46%

* Non-fossil energy = biomass energy + waste energy

Recycling of Paper Products

The Nippon Paper Group is working diligently to increase the waste paper collection rate with the support of customers and the general public. In addition to bolstering its recycled paper processing capabilities, the Group is striving to expand the range of applications for pulp made from wastepaper.
Targeting New Value through Our R&D and Business Strategy

The Nippon Paper Group is creating new value as a comprehensive biomass company shaping the future with trees.

R&D Activities Targeting Long-Term Growth

The Paris Agreement1 was adopted at the United Nations Framework Convention on Climate Change in 2015. As a signatory to the agreement, the Japanese government established the objective of achieving an 80% reduction in greenhouse gas emissions by 2050. The use of woody biomass can make a large contribution to the achievement of a low-carbon society (see pages 40, 41), and interest in this renewable natural resource is rising. The Nippon Paper Group, as a comprehensive biomass company, aims to develop ecologically friendly products and promote them across the globe.

R&D is key to that effort. To increase the amount of wood we can harvest per unit area, we are researching the application of cutting and hybridization technologies for trees. We are also developing cellulose nanofiber (CNF) (see page 11), a new material derived from cellulose - a component of wood and the raw material for paper. At the same time, our Cellulose Nanofiber Research Laboratory and newly established Innovative Material Sales Division are working to develop CNF applications. Lignin is another important component of wood and we have devoted significant efforts to using it as a fuel for our in-house power generation facilities and to developing lignin-based products. In addition, we, as a biorefinery, are moving forward with a Japanese-government-led project exploring possibilities for lignin as a raw material.

In the area of paper-based products, we have accelerated the development of ecologically friendly products by establishing the Packaging Research Laboratory and Packaging Communication Center, which performs marketing functions, in 2016. We did this in light of the overwhelmingly positive response to SPOPS® (see page 51) – the world’s first Paper-Pak replaceable shampoo dispenser cartridge – and our new SHIELDPLUS® (see page 52) packaging material with exceptional barrier properties.

As a comprehensive biomass company, the Nippon Paper Group performs R&D that is also valuable for achieving Sustainable Development Goals (SDGs)2. New materials can contribute to SDG achievement, but R&D in this area usually requires long periods of time. To accelerate it, we will apply approaches such as open innovation when necessary. We aim to achieve sustainable growth by accelerating R&D and developing new businesses. And it is through the pursuit of R&D with a long-term perspective that we will help to enrich daily life and culture for people throughout the world.

Relevant Sustainable Development Goals

The Nippon Paper Group can achieve SDGs by successfully implementing its business model. In R&D, work proceeds with the aim of achieving SDGs over the medium-to-long term.

Main R&D Themes

Nurture

Technical assistance to plantations
- Rapid improvement in growth of plantation trees
- Genetic improvement of plantation trees
- Development of efficient analysis methods for wood properties
- Environmental improvement in plantation areas

Sources of Growth

The Nippon Paper Group’s Wood Science Technologies

Nippon Paper Industries’ Global Biomass Resources

181 thousand hectares in total
Company-owned forests in Japan: 90 thousand hectares
Overseas afforestation areas: 91 thousand hectares

Apply

Biorefinery
- DKP
- Fuel by torrefaction
- Chemical production

Cellulose nanofiber (CNF)
- Production technology development
- Application development
- International standardization
- Safety

Kazufumi Yamasaki
Executive Vice President, Representative Director and General Manager of the Research & Development Division and CSR Division Nippon Paper Industries Co., Ltd.

2 Sustainable Development Goals (SDGs): 17 global goals with 169 targets. Adopted by over 150 leaders of member states at the United Nations Sustainable Development Summit held in September 2015.
Implementing the Three-Year Medium-Term Business Plan

Working from a base of enhancing profitability in the domestic and overseas paper and paperboard businesses, the Nippon Paper Group is expanding businesses in growth areas by transforming the business structure.

Overview of the Fifth Medium-Term Business Plan

Reallocate Management Resources - People, Materials, Money, Information

Enhance competitiveness of existing businesses
Support earnings

Examples of Results Achieved with Technologies and Assets on Hand

Growth Areas / New Businesses

Energy
- Expansion of wind power, biomass power generation, and other renewable energy businesses
- Development of biomass fuels

Cellulose Nanofiber (CNF)
In April 2017, we commenced operation of a high-capacity production facility for CNF. This facility, located at the Ishinomaki Mill, chemically treats wood pulp to produce CNF with a uniform fiber width of 3 nm. Product development work will focus on creating items such as antibacterial/deodorizing sheets, transparent sheets, paint additives, and other industrial products.

Healthcare
The Poise® Hada Care Pad and the Hada Care Acty® series - CNF products with high deodorizing capacity - respond to the needs of an aging society. Going forward, management resources will continue to be directed toward the healthcare business, which is expected to continue growing.

Liquid Cartons
Pure-Pak Curve, a new type of paper carton with a resealable closure, was adopted for use by the manufacturer of a major brand of fruit juice. Sales of these products in Pure-Pak Curve containers began in March 2017. As Japan’s largest total system supplier of liquid cartons, we are committed to moving forward with the development of more new products.
Social Issues and the Nippon Paper Group's Value Creation Flow

Toward Sustainable Social Development

As shown in the diagram below, the Nippon Paper Group addresses social issues through its value chain. Among these social issues, we identified materiality items. (see page 14) In the upper right part of the diagram are SDGs the Group can work to achieve either through the execution of its sustainable business model (see pages 8-9) or through minimization of negative impacts of business activities. These SDGs are particularly relevant for the Nippon Paper Group because of their economic, environmental, and social impacts. They are, therefore, viewed as overlapping with materiality items and are also matters for us to consider carefully from a medium-to-long-term perspective in our R&D activities.

Addressing Social Issues in Our Value Chain

SDGs with Particular Relevance for the Nippon Paper Group's Materiality Items

**Goal 15 Life on Land**
Enable the sustainable use of the public functions of forests and the services of ecosystems by properly managing company-owned forests.

**Goal 13 Climate Change Initiatives**
Help to reduce the loss of forests by strictly practicing proper, legal procurement. Strive to rein in CO2 emissions in all business activities.
**Goal 7 Providing Environmentally and Socially Conscious Products**
Help to protect the environment and enhance the sustainability of resources through technical innovations making greater use of renewable biomass resources.

**Goal 8 Clean Water and Sanitation, and Life on Land**
Prevent environmental pollution from Group manufacturing activities by reining in emissions or discharges of water, air, and soil contaminants.

**Goal 9 Good Health and Well-Being**
Take every possible measure to protect working people from disease and injury by implementing extensive workplace safety measures and conducting thorough training and education.

### Initiatives in Our Value Chain

**Production**
- Reduction of environmental impacts (Water and air pollutants, waste, noise, vibration, odor, chemical substances, etc.)
- Development and manufacturing of environmentally and socially conscious products

**Shipping**
- Increase in load efficiency (Promotion of modal shifts)
- Shortening of transportation distances (Pursuit of direct delivery and reorganization of distribution warehouses)

**Sales and Usage**
- Promotion of the collection and use of wastepaper (Strengthening of waste paper processing capacity, expansion of use of unutilized waste paper, improvement of recycled paper pulp quality)

**Separation, Collection, Recycling, and Disposal**
- Promotion of wastepaper collection together with customers (Support for recycling organizations, establishment of waste paper collection facilities, etc.)

### Climate change initiatives

- The stable supply of products
- Ensuring quality and safety
- Providing environmentally and socially conscious products
- Enhancement of product safety
- Pursuing customer satisfaction
- Appropriate disclosure of product information
- Addressing customer questions and opinions

### Bussiness Continuation in time of emergency

- Hiring practices that respect human rights
- Securing diversity in the workforce
- Human resource development
- Occupational safety and health, disaster preparedness
- Creation of comfortable work environments
- Respect for basic human rights
- Coexistence with areas surrounding mills (job creation, education support, contributions to local environments, cultural preservation, promotion of safety and disaster preparedness, etc.)

### Appropriate information disclosure, promotion of communication, and environmental education activities

- Ensuring safety in shipping (Promotion of transportation safety)
- Reduction of impacts of shipping (Promotion of transportation safety, adoption of low emission vehicles, promotion of noise abatement measures)
- Working with local communities to promote wastepaper collection

- Promotion of appropriate information disclosure and communication

---

Nippon Paper Group Sustainability Report 2017
The Nippon Paper Group, working from a foundation of sustainable forest management, contributes to better living and cultural progress as a comprehensive biomass company making full use of, and recycling, renewable wood resources.

Proper management can make forests into sustainable resources and enable the preservation of biodiversity. Sequestering CO2 in forests and using wood resources helps to fight global warming. And using renewable wood resources prevents resource depletion.

Creating new products and expanding our activities as a comprehensive biomass company, we manage and operate expansive forests and large-scale production sites. We, therefore, have a significant impact on the local areas and people who work there. Coexistence with these communities, as well as reducing environmental impacts and securing the safety and health of our local employees, therefore, are critical to our own continued existence.

Moreover, the opinions of our stakeholders serve as valuable opportunities to grasp issues that are important for coexisting and growing with society in a sustainable way.

Therefore, the materiality items given above are of particular importance among our initiatives addressing social issues in our value chain (see pages 12–13).

We identify materiality items as described in the diagram to the right.
Management Responsibility

The opinions of stakeholders are important for bringing attention to issues that could affect the Nippon Paper Group’s coexistence with society and efforts to grow sustainably.

Corporate Governance and Information Disclosure

Further enhancing transparency and practicing fair management, while pursuing sustainable growth and medium-to-long-term increases in corporate value

Basic Stance

Striving to achieve sustainable growth and medium-to-long-term increases in corporate value

Nippon Paper Industries Co., Ltd. established its Corporate Governance Policy in November 2015 to achieve sustainable growth and medium-to-long-term increases in corporate value for the Nippon Paper Group in ways that are consistent with the Group Mission (see page 5). The Company is acting in accordance with all of the fundamental principles of Japan’s Corporate Governance Code.

Our highest management priority is to achieve even greater transparency toward shareholders and other stakeholders and engage in fair business practices. The Company has adopted an executive officer system and is working to strengthen the oversight function of its Board of Directors to ensure the separation of business execution and management oversight. In addition, as the leader of the Nippon Paper Group, the company is implementing growth strategies, monitoring businesses under its control, and promoting compliance.

Corporate Governance Structure

Working to enhance management efficiency and credibility

The Company’s Board of Directors is comprised of seven internal directors and two outside directors, for a total of nine directors, as of June 29, 2017. By combining internal directors with outstanding track records and management capabilities in the operations they oversee, and outside directors with high levels of knowledge and experience, the Company has assembled a diverse Board of Directors that is exceptionally well-balanced in terms of knowledge, experience, and capabilities.

The Management Execution Committee meets weekly, in principle, to support the business execution activities of the president, and to consider important operational matters. The Management Strategy Committee meets as needed to discuss management strategies for particular business areas, and other matters of importance for the Group.

The Board of Statutory Auditors monitors the company’s management. Two of the four statutory auditors comprising the board are outside statutory auditors responsible for strengthening the board’s monitoring and auditing functions by contributing opinions from a third-party perspective.

Initiatives for Strengthening Corporate Governance

              • Increased the number of independent outside directors to two |

Corporate governance structure (as of June 29, 2017)
Determined on the basis of responsibilities and performance

Nippon Paper Industries Co., Ltd. has defined the policy for officer remuneration in its Corporate Governance Policy Article 8.

Fiscal 2016 total remuneration\(^1\) for directors and corporate auditors

<table>
<thead>
<tr>
<th>Officer class</th>
<th>Number of officers</th>
<th>Total remuneration for all members of the officer class</th>
</tr>
</thead>
<tbody>
<tr>
<td>Directors</td>
<td>9</td>
<td>¥389 million per year</td>
</tr>
<tr>
<td>Corporate auditors</td>
<td>5(^2)</td>
<td>¥61 million per year</td>
</tr>
</tbody>
</table>

\(^1\) Rounded down to the nearest million yen.  
\(^2\) Includes 1 corporate auditor who resigned during the year ended March 31, 2017.

Working to enhance management transparency

To further enhance corporate governance, Nippon Paper Industries Co., Ltd. established the Personnel & Remuneration Advisory Committee in April 2016. Created as an advisory body to the Board of Directors, the committee is structured to include independent outside directors as key members.

When requested by the Board of Directors, the Personnel & Remuneration Advisory Committee, with appropriate involvement and input by the two outside committee members, considers matters concerning topics such as the process for nominating Company director and statutory auditor candidates; the quality of, and rationale for, nominations; the criteria for judging the independence of independent outside directors; and the directors’ compensation structure. The Board of Directors, after receiving recommendations from the Personnel & Remuneration Advisory Committee, makes decisions on director and statutory auditor nominations, compensation for directors, etc.

Increasing the effectiveness of the Board of Directors

To continuously strengthen the functions of the Board of Directors Nippon Paper Industries Co., Ltd. began in fiscal 2015 to have its Board of Directors engage in analyses and evaluations of their own effectiveness.

Once each year, the Secretariat of the Board of Directors’ Meeting asks each director and corporate auditor to complete a survey on matters such as board operations and deliberations. Based on survey results, the Board of Directors analyzes and evaluates its performance and then uses what it has learned to improve its effectiveness going forward.

Overview of FY2016 Evaluation Results

Based on the results of questionnaires the Company asked each director and statutory auditor to complete regarding the effectiveness of the Board of Directors, in light of the establishment of the Corporate Governance Policy, and the results of amendments, etc. to the criteria for submitting agenda items for Board of Directors’ Meetings, the Board of Directors prepared a current-state evaluation of its effectiveness and identified issues to be improved.

Current Status

Efforts based on each principle of the Corporate Governance Code have been progressing favorably and the effectiveness of the Company's Board of Directors is appropriate on the whole.

Main Points for Improvement

1. Further enhancement of reporting to the Board of Directors

As a result of the evaluation in fiscal 2015, the Board of Directors identified the enhancement and reinforcement of the Company’s basic policy on management, and of deliberation and reporting on matters related to corporate governance, as an issue to be improved. By making amendments to the Rules for the Board of Directors (put into effect in April 2016), the Company clarified the types of matters that should be deliberated by the Board of Directors, to enhance the quality of deliberations. With respect to the evaluation in fiscal 2016, it was confirmed that the quality of deliberations at Board of Directors’ Meetings had been further enhanced. For fiscal 2017, it was decided to further enhance the reporting of operational matters, to strengthen the supervisory function of the Board of Directors.

2. Ensuring training opportunities for directors and statutory auditors

In fiscal 2015 and 2016, the Company invited outside experts as lecturers and held seminars for corporate officers. From fiscal 2017, the Company will work on improving training conditions further by, for example, arranging outside seminars.
In accordance with Japan’s Companies Act and related laws and regulations, Nippon Paper Industries Co., Ltd.’s Board of Directors approved the Basic Policy for Establishing the Internal Control System in 2006 and has revised it as necessary since then. As called for by the basic policy, systems that are required for the Board of Directors to perform its duties in accordance with laws and regulations, and with the Company’s Articles of Incorporation, and systems that are required for the Nippon Paper Group to properly pursue its business activities have been established and are being used.

- Financial reporting internal controls
  To comply with the internal control reporting system requirements stipulated under the Financial Instruments and Exchange Act of Japan, the Management Audit Office assesses the status and operation of financial reporting internal controls. Based on these assessments, it has been determined that effective financial reporting internal controls were in place at Nippon Paper Industries Co., Ltd., and 24 consolidated subsidiaries, as of March 31, 2017.

## Position on Information Disclosure

**Enhancing management transparency through active information disclosure**

The Nippon Paper Group constantly strives to enhance the soundness and transparency of its management by disclosing company information in accordance with our Action Charter (see page 19). This policy is provided in the Nippon Paper Group Disclosure Policy adopted in October 2005.

Following the guidelines of this basic policy, we comply with the provisions of the Financial Instruments and Exchange Act of Japan and other relevant laws and regulations. We disclose information in a timely manner, standing on the principles of transparency, fairness and continuity. Furthermore, we disclose information that may not be required under applicable laws, regulations, or timely disclosure rules, when deemed to be of interest to our stakeholders and other members of society.

**Information Disclosure Policy**
http://www.nipponpapergroup.com/english/ir/disclosure/policy/

## Participating in Organizations in Japan and Abroad

**Seeking to connect to and work with external parties**

The Nippon Paper Group strives to share information with other companies, international organizations, governmental institutions, labor organizations, and NGOs in countries around the world, and contribute to various activities together with these partners.

- **The United Nations Global Compact**
  Nippon Paper Industries Co., Ltd. announced its decision to support the 10 principles covering the four fields of human rights, labor, environment and anti-corruption and joined the United Nations Global Compact as a signatory in November 2004.

**Comment**

**Working to strengthen corporate governance**

Makoto Fujioka, Outside Director, Nippon Paper Industries Co., Ltd.

I believe the purpose of corporate governance is to work for the benefit of shareholders and other stakeholders by ensuring highly transparent, fair management and helping the company realize ongoing growth and medium-to-long-term increases in corporate value.

In my career, I have accumulated experience in government, working with economic and industrial matters, and in corporate management. As an outside director, I draw on my public- and private-sector experience and knowledge, and on my international experience, to participate in management oversight and provide advice from an objective perspective.
CSR Management

Advancing CSR activities that help to build a sustainable society through business endeavors

Management Structure

Oversight through the CSR Division

Nippon Paper Industries Co., Ltd. established the CSR Division to oversee the CSR activities of the Group as a whole. The CSR Department and Public Relations Office were set up within the CSR Division. The CSR Department promotes CSR activities based on the Action Charter and works closely with the various divisions and departments.

The Nippon Paper Group’s Action Charter

1. We shall pursue a sustainable growth for the future to contribute to society through our business activities.
2. We shall abide by the letter and the spirit of laws and regulations, and comply with the highest ethical standards and social codes of conduct, both in Japan and abroad.
3. We shall conduct our business in a fair, transparent and liberal manner.
4. We shall win the trust of customers through the development and provision of socially useful and safe products and services.
5. We shall disclose corporate information positively and fairly to all stakeholders of the Group.
6. We shall actively address environmental issues, and shall endeavor to conserve and enhance the environmental state of our planet.
7. We shall maintain consistency between corporate development and the personal contentment of individual employees, and create a company filled with dream and hope.

Supporting CSR activities by Group companies

Nippon Paper Industries Co., Ltd.’s CSR Department hosts regular CSR liaison meetings with personnel in charge of CSR at principal Group companies. These meetings are held to communicate directions being taken with regard to CSR matters and to share opinions. They are also used as opportunities to hear discussions of CSR activity trends by invited consultants, and to hold workshops.

Surveying Employees on Important CSR Matters

In February 2017, the Nippon Paper Group conducted a survey to gather input from employees, as stakeholders, on matters of CSR Materiality (see page 14). We considered and identified materiality items for fiscal 2017 in light of factors such as impacts on outside stakeholders (see page 14).

Meeting social responsibilities through business activities

The Nippon Paper Group aims to contribute to the development of a sustainable society through its business activities. Toward that end, we are committed to grasping the expectations and demands of our stakeholders, and fulfilling our social responsibilities from the perspectives of business management; forest management and the procurement of raw materials; the environment; customers; human rights, employment, and labor; and local communities.

Recognition as an ESG Investment

Nippon Paper Industries Co., Ltd. is included in key ESG (environment, social, and governance) indices in Japan and abroad.

Key indices of which Nippon Paper Industries is a component

- FTSE4Good Index Series
  - Component since June 2017
  - Developed by FTSE Russell, a member of the London Stock Exchange Group plc
  - MSCI Japan ESG Select Leaders Index

- MSCI Japan ESG Select Leaders Index

- FTSE Blossom Japan Index
  - Component since July 2017
  - Developed for ESG investment conducted by Japan’s GPIF (Government Pension Investment Fund)

- Ethibel EXCELLENCE Investment Register
  - Component since February 2013
  - An investment universe managed by Forum Ethibel, a Belgian organization that promotes socially responsible investment

- Euronext Vigeo index: World 120
  - Component since December 2014
  - An equity index developed by NYSE Euronext, which operates securities exchanges in Europe and the U.S., and by Vigeo Eiris, an enterprise that assesses companies
Compliance

As a committed partner ensuring that employees are fully informed about compliance, the Nippon Paper Group engages in corporate activities in accordance with laws and social norms.

Promoting compliance throughout the Group

The CSR Division of Nippon Paper Industries Co., Ltd. serves as a facilitator and driving force behind efforts to achieve and reinforce understanding of compliance throughout the Nippon Paper Group.

Each Group company appoints a person to be in charge of compliance within its organization, and Nippon Paper Industries’ Compliance Office actively hosts Group Compliance Liaison Meetings to provide all employees in charge of compliance with information on important policies and measures, opportunities to share information, and advice on education and training activities.

Implementing compliance education

The Nippon Paper Group conducts training on an ongoing basis to further enhance compliance awareness and understanding. We, together with a consultant from outside the Group, conduct practical training that involves group discussions and is tailored to the specific needs of production sites and sales offices.

Education on compliance is also provided through avenues such as stratified training in the form of new-hire training and training for newly appointed managers at principal Group companies.

In fiscal 2016, basic training was conducted for 960 employees, and stratified training and training on topics such as Japan’s Antimonopoly Act was conducted for 200 employees.

Personal Information Protection

Maintaining a systematic structure and rules

Nippon Paper Industries has taken steps to ensure clear understanding of the structure and rules applicable to the handling of personal information. The personal information of customers, business partners and employees is controlled by clearly stated rules and a manual, and is tracked and managed in control ledgers by individual related departments as required by the Private Information Protection Law. These ledgers contain details of the dates when personal information was obtained and the purposes for holding it, and are reviewed annually to eliminate data for which the holding period has expired and take other actions, as well, to ensure that information is handled properly.

Group Internal Whistleblower System

Encouraging reporting via a help line on activity in conflict with compliance

The Nippon Paper Group has established its help line system to allow any employee of the Group to provide direct notification of, or seek advice outside the chain-of-command on, any action in the workplace that could violate laws, social norms or corporate ethics. The Compliance Office located within the CSR Department serves as a point of contact within the Group. We have also established points of contact outside the Group for use by employees as appropriate.

The help line system guarantees the privacy of whistleblowers and takes steps to ensure that they do not suffer because they have reported questionable activity or have sought advice.

<table>
<thead>
<tr>
<th>Trends in the number of notifications received by the help line</th>
</tr>
</thead>
<tbody>
<tr>
<td>21</td>
</tr>
</tbody>
</table>

Flow of the help line system

Respect for Intellectual Property

Education programs on intellectual property rights and compliance

The Nippon Paper Group’s emphasis on intellectual property is evident not only in research and development but also in all of its business activities, and the Group adheres strictly to all applicable laws and regulations. Members of the Intellectual Property Department of Nippon Paper Industries, and outside patent attorneys, conduct intellectual property education programs for the benefit of Group company employees.

A total of 469 employees attended the 17 programs in fiscal 2016.
Dialogue with Stakeholders
Actively creating opportunities for dialogue to promote coexistence with society

Basic Stance
Actively promoting dialogue
The Nippon Paper Group actively establishes contact points and opportunities for direct dialogue with all stakeholders while regularly providing information on our operations and promoting the exchange of opinions. Each of our business locations actively creates opportunities for regular communication on risks and other matters. And stakeholder opinions are received through channels such as our website, Sustainability Report, and ShikiOriori, the CSR communication magazine we publish to provide plain and simple explanations of our CSR initiatives.

We carefully consider the feedback we receive and reflect it in management decision making aimed at enabling the mutually beneficial ongoing development of society and the Nippon Paper Group.

IR Activities
Promoting dialogue with shareholders and investors
Nippon Paper Industries Co., Ltd. strives to gain understanding of the Group’s business direction by engaging shareholders and other investors in constructive dialogue. Furthermore, we reflect the opinions of investors and the business analysis perspectives of capital providers in our management to promote sustainable growth and medium-to-long-term increases in corporate value for the Group.

Tours and other events
The Nippon Paper Group conducts annual plant tours to promote a deeper understanding of its business activities. The tours of Nippon Paper Industries’ Akita Mill in fiscal 2016 attracted considerable praise from participants.

General shareholders’ meeting, shareholder communications, and IR website
Nippon Paper Industries Co., Ltd. strives to disclose and otherwise provide information in a timely, appropriate manner to enhance dialogue with shareholders at the general shareholders’ meeting. In preparing general shareholders’ meeting announcements, for example, we provide shareholders with copious amounts of important information, which we strive to make as clear and straightforward as possible. For the general shareholders’ meeting held in June 2017, we sent announcements early – 23 days before the meeting date – and disclosed meeting materials even earlier – seven days before we sent the announcements - on our website and through other channels.

In addition, we distribute shareholder communications twice a year and make timely disclosures on our website, which we also use to receive inquiries about the Nippon Paper Group.

On Sustainable Procurement of Raw Materials

The Nippon Paper Group employees in charge of procurement visited Niwa Mokuzai, a company supplying domestic wood chips to Nippon Paper Industries’ mills in the Tohoku region of Japan. During their visit, they asked the company’s president, Mr. Ogasawara, about biodiversity, safety and health, and community coexistence initiatives that are critical for his company’s success.

(Interviewers: Kenji Ishii and Yoshihiro Kohata of Nippon Paper Lumber Co., Ltd.)

Kiyotaka Ogasawara
President
Niwa Mokuzai Ltd.

Company Profile
Name: Niwa Mokuzai Ltd.
Head office: Takizawa City, Iwate Prefecture
Main business activities: Forest management, lumber milling, wood chip production

— What have you found to be critical for the continuation of your business?
Ogasawara: Stability in business relationships. Maintaining business relationships makes it possible to shrink sales costs, which involve various types of uncertainties, and achieve management efficiencies. This in turn makes it possible to direct resources toward environmentally friendly forest management.

— What initiatives has your company taken for the environment and what impact has Nippon Paper Industries had in this sense?
O: In our part of Japan, we were the first company to gain SGEC certification (see page 26) and, in our operations, we strive to maintain biodiversity through measures such as protecting soil, protecting trees along streams, and monitoring ecosystems, all in accordance with internal rules. Before conducting thinning operations, we use a checklist to determine whether there are any rare species present (see page 44). We have also obtained CoC certification (see page 26) and have established a distribution system for timber from certified forests. In gaining SGEC certification, there were some hurdles to overcome and Nippon Paper Industries helped us with advice based on their own experience in gaining forest certifications.

— What has been the impact of Nippon Paper Industries in terms of health and safety?
O: Nippon Paper Industries has provided us with information on initiatives in other regions and the active discussions we engage in have added new energy to our safety awareness. In addition, when we encounter a problem, Nippon Paper Industries has been considerate in providing advice, based on its stance of solving problems together.

— What are your thoughts regarding staff management?
O: We hold company tours and accept students for internships. Our purpose is to teach local residents, from the time they are children, about the forest and lumber industries, and to have them understand that cutting trees is not equivalent to destroying nature.

— What does your company do to promote coexistence with the local community?
O: We hold company tours and accept students for internships. Our purpose is to teach local residents, from the time they are children, about the forest and lumber industries, and to have them understand that cutting trees is not equivalent to destroying nature.

— What does your company do to promote coexistence with the local community?

Forest Management and Raw Material Procurement Responsibility

The Nippon Paper Group, as a comprehensive biomass company pursuing business endeavors that are founded on sustainable forest management and promote sustainable growth by using, and later recycling, every bit of the renewable wood resources it harvests, contributes to better living and cultural progress.

With sustainable forest management, biodiversity can be protected. Because forests act to sequester CO₂, using wood resources actually helps to prevent global warming.

Policy and Management
Practicing sustainable procurement of raw materials in ways that consider environmental and social concerns in line with our philosophy and basic policy

Basic Stance
Pursuing sustainable and stable wood resources procurement

Woodchips and wastepaper, as recycled material, are the main raw materials for pulp and paper. Procurement of these materials entails the support not only of suppliers in and outside of Japan, but also the communities and government authorities of local production areas. Taking into consideration relationships with the environment and society, the Nippon Paper Group recognizes the importance of working closely with suppliers to establish a sustainable supply chain that incorporates production area forest ecosystem, local community, occupational safety and health as well as other concerns.

Accordingly, we have built and implemented a structure and framework that will allow us to sustainably procure renewable wood resources.

Philosophy and Basic Policy
Philosophy and basic policy reflecting the opinions of stakeholders

The Nippon Paper Group established its Philosophy and Basic Policy Concerning Raw Materials Procurement in fiscal 2005. In formulating this philosophy and basic policies, a draft proposal was released to the public so as to solicit the opinions of stakeholders in Japan and overseas. The Group considered all of the close to 2,000 comments received, and incorporated several suggestions into revisions made to the draft.

Philosophy and Basic Policy Concerning Raw Materials Procurement
(formulated on October 5, 2005)

Philosophy
We are committed to establishing a reliable raw materials procurement system through global supply chain management in consideration of the environment and society.

Basic Policy
1. Environmentally friendly raw materials procurement
(1) We procure woodchips, lumber and pulp from forests under sustainable forest management.
(2) We use and deal in no illegally logged lumber and we support the eradication of illegal logging.
(3) We make active use of recycled materials to help build a recycling-oriented society.
(4) We make appropriate procurement of chemical substances in compliance with relevant laws and regulations.
(5) We build traceability systems to ensure the above policies are practiced throughout the supply chain.

2. Socially aware raw materials procurement
(1) We pursue fair deals with suppliers on equal terms.
(2) We ensure that the entire supply chain has appropriate human rights and labor practices.

3. Promotion of dialogues with stakeholders
(1) We engage in dialogues with stakeholders to improve the quality of our raw materials procurement in constant consideration of the environment and society.
(2) We proactively disclose information so that our initiatives are better known.

Sustainable Forest Management
Practicing proper planning and management

Forestry management considers not only economic, but also environmental and social sustainability. The Nippon Paper Group defines sustainable forest management as:
1) Biodiversity is conserved.
2) The productivity and soundness of the forest ecosystem is maintained.
3) Soil and water resources are conserved.
4) Diverse social needs are satisfied.

Proper planning and management are important factors in the sustainable management of forests. A considerable amount of time is required to cultivate trees to their maturity. In putting together a viable sustainable forest management plan, it is important to consider factors including the areas allocated to afforestation and harvesting, the rate of growth, the surrounding environment and the impact on society.

Landscape concerns related to efforts to protect waterside forests and address other such needs must also be examined. Taking full advantage of its expertise in forest management, the Group is promoting proper planning and management.

Framework for Promoting Raw Materials Procurement Management
Overseeing raw material procurement for the entire Group

The Nippon Paper Group established the Raw Materials Committee, chaired by the general manager of the Raw Materials and Purchasing Division at Nippon Paper Industries. This subcommittee deliberates on a wide variety of important issues concerning raw material procurement, including the Group’s overarching procurement policy.
Current Status of Raw Materials Procurement

Using wastepaper and wood resources as raw materials

The Nippon Paper Group is engaged primarily in the manufacture of paper products. 55.1 percent of the raw materials are composed of recycled paper and the remaining 44.9% consists of such wood resources as woodchips. Both types of raw materials are used to produce pulp.

- **Initiatives aimed at stable wastepaper procurement**
  With each passing year, the collection of wastepaper has taken on greater importance for reducing waste volumes and reusing materials. For Japan’s paper industry, wastepaper is an essential resource accounting for more than half of the raw materials it uses.
  Against this backdrop, the Nippon Paper Group has maintained a stable system for procuring wastepaper. This system, the product of many years of collaboration with the wastepaper industry, promotes the recycling of wastepaper.

- **Initiatives aimed at stable wood resource procurement**
  Of the wood raw materials Nippon Paper Industries procures, slightly more than 60% are sourced from overseas and a little below 40%, from Japan. To help ensure stable supplies, overseas procurement is diversified among multiple countries, including Australia.

Forest Management and Raw Material Procurement Responsibility

Policy and Management / Current Status of Raw Materials Procurement

Forest Management and Raw Material Procurement Responsibility

Current Status of Raw Materials Procurement

In addition to actively promoting the use of recycled paper, we procure wood resources from sustainably managed forests.
**Basic Stance**

**Focusing on legal compliance and transparency in the procurement of raw materials**

The Nippon Paper Group is a strong advocate of sustainable raw materials procurement that takes into consideration environmental and social concerns. Our procurement of wood raw materials rests on the principles of legality and emphasizes sustainability, clear identification of the origin of wood resources, and full accountability.

When purchasing from external suppliers, we make every effort to enhance our supply chain management capabilities, taking into consideration environmental and social needs. At the same time, we use a system that employs third-party forest certification programs to confirm the propriety of raw materials procurement.

In the context of procurement from company-owned forests, we pursue overseas afforestation projects to increase our plantation timber procurement. Moreover, we practice sustainable forest management by maintaining forest certifications acquired for company-owned forests both in Japan and overseas.

**Key points of sustainable wood resources procurement**

- Sourcing from sustainable forests (sustainability)
- Clearly identifying the origin of timber (traceability)
- Maintaining full accountability (accountability)

**About the Clean Wood Act**

Japan's Act on Promotion of Use and Distribution of Legally Harvested Wood and Wood Products (the Clean Wood Act) took effect in May 2017. The act includes criteria for confirming the legality of harvested wood – criteria the Nippon Paper Group has been meeting in its raw material procurement activities since before the Clean Wood Act took effect. Going forward, the Group intends to register with additional third-party institutions maintaining records in support of legal compliance.

**Action Plan for Wood-Based Raw Material Procurement**

**Eradicating illegal logging while promoting environmentally and socially aware procurement**

The Nippon Paper Group has put in place its Action Plan for Wood-based Raw Material Procurement, in keeping with the Group’s Philosophy and Basic Policy Concerning Raw Materials Procurement. This action plan provides a roadmap that incorporates checks on the legality of woodchips, and consideration for human rights, labor, local communities, and the protection of biodiversity, allowing the Group to practice CSR procurement. This action plan also helps enhance traceability with respect to woodchips procured from overseas while placing considerable emphasis on trade association certification of the legality of woodchips produced in Japan.

Nippon Paper Industries, in connection with annual forest certification audits and audits performed by the Japan Paper Association’s illegal logging monitoring project, has third parties perform objective assessments to determine whether it is conducting wood resource procurement in accordance with its basic policies. Suggestions from these assessments are then used to make improvements.

**Overview of major forest certification programs**

<table>
<thead>
<tr>
<th>Certification program name</th>
<th>Details and features</th>
</tr>
</thead>
<tbody>
<tr>
<td>FSC®—Forest Stewardship Council®</td>
<td>FSC® is a non-profit international member-based organization that certifies that forests are being managed in compliance with its 10 principles and 70 standards. FSC® has adopted the FM and CoC certification system.</td>
</tr>
<tr>
<td>PEFC—Programme for the Endorsement of Forest Certification</td>
<td>PEFC bases its sustainability benchmark on a broad consensus expressed in intergovernmental processes and guidelines. It provides a mutual recognition system that endorses compatibility and comparability of the responsible forest management systems of individual countries. Launched across countries in Europe, the program encompasses the forest certification programs of 49 countries around the world. In similar fashion to FSC®, PEFC has adopted the CoC certification system. Examples of certifications mutually approved by PEFC (for forests owned by Nippon Paper Industries Co., Ltd.) Australian Forestry Standard (AFS), Australia / CERTFORCHILE: Chile / CERTFLOR: Brazil</td>
</tr>
<tr>
<td>SGEC—Sustainable Green Ecosystem Council</td>
<td>SGEC engages in an evaluation based on seven criteria while taking into consideration Japan’s natural environment as well as its social customs and culture. SGEC has also adopted the CoC certification system. Mutual certification with PEFC was approved in June 2017.</td>
</tr>
</tbody>
</table>

*FM and CoC Certification*

The forest certification system is composed of two components—the Forest Management (FM) component, which certifies that forests are responsibly managed, and the Chain-of-Custody (CoC) component, which certifies that products from certified forests have been properly processed and distributed. Under the FM certification system, a third party certifies that the management of forests is being undertaken in a sustainable manner based on various objective benchmarks including (1) compliance with regulatory requirements and system frameworks, (2) maintenance and conservation of forest ecosystems and biodiversity, (3) respect for native and local resident rights, and (4) maintenance and improvement of forest productivity.

CoC certification is a system covering all operators engaged in the processing and distribution of timber materials. In addition to tracking products (certified woodchips) from certified forests in each process including processing and distribution, CoC certification confirms that a risk assessment of all non-certified woodchips has been undertaken. Products display a certification mark in the event that all operators have acquired CoC certification across all processes.
At Nippon Paper Industries Co., Ltd.,
• All company-owned forests in Japan and overseas have received forest certifications.
• All wood-based raw materials have been certified by the PEFC or FSC® (All procured chips have been produced with wood from forests with an FM certification or have undergone a risk assessment for the CoC certification.)
Protecting and Nurturing Japan’s Wood Resources

Maintaining a focus on forest management that takes into consideration the characteristics of each region in an effort to promote sound growth

Sustainable Management of Company-Owned Forests in Japan

Practicing sustainable forest management at company-owned forests over an area extending to 90 thousand hectares

Nippon Paper Industries owns approximately 90 thousand hectares of forest in around 400 locations in Japan, the second largest private-sector holdings of forest in the country. SGEC Forest Certifications have been obtained for all of the forest.

For the Nippon Paper Group, forests are not only an important business resource—as a corporate group whose existence is closely tied to the health and conservation of forests, we recognize and work to manage the integrity of the multifaceted functions forests play within society.

- Maintaining company-owned forests in Japan
Nippon Paper Industries allocates approximately ¥0.6 billion each year to the maintenance and management of company-owned forests in Japan, which entails the clearing of undergrowth and thinning. As a company which has continued to benefit from and grow through forests and forest products, we are committed to balanced, sustainable forest management that allows forests to fulfill their multifaceted functions—including ones that benefit biodiversity protection and watershed conservation—despite the fact that forests within Japan are not currently economically viable because of the stagnant price of domestic timber.

- Environmental forest designations, biodiversity-conscious forest management
Nippon Paper Industries has designated approximately 20%, or 18 thousand hectares, of forest areas owned in Japan as “environmental forest areas.” In these areas, the logging of trees for the purpose of lumber production is prohibited and the environmental functions of forests (forest ecosystems, watershed conservation, etc.) are conserved.

Invigorating Japan’s Forest Industry

Actively utilizing domestically produced timber while contributing to the prevention of forest deterioration

In recent years, deterioration of artificially planted Japanese cypress and Japanese cedar forests throughout Japan has become a concern. The reason for this deterioration is low lumber prices that have squeezed forest industry profitability and made it impossible to perform thinning and other necessary maintenance. To invigorate the industry and prevent further forest deterioration, the Japanese government, under its Forest and Forestry Basic Plan, has committed itself to promoting the use of domestically produced wood, and lifting the nation’s wood self-sufficiency rate to 50% by 2025.

Promoting the use of domestic timber
With its network for domestic timber collection in Japan, and its ability to handle a comprehensive lineup of products, Nippon Paper Lumber is actively developing its domestic timber business. In fiscal 2016, the company handled approximately 830 thousand m³ of domestically produced materials, and ranked second in its field in Japan. The company aims to lift this figure to 1 million m³, and, to this end, is continuing to develop new applications while working to boost exports.

Distribution of company-owned forests in Japan and composition by tree species (Nippon Paper Industries Co., Ltd.) (As of March 31, 2017)

- Actively utilizing domestically produced wood, and lifting the nation’s wood self-sufficiency rate to 50% by 2025.

- Promoting the use of domestic timber

- Supporting the activities of the Shirane-aoi Glaucidium palmatum Preservation Group (see page 46)

- Has established a bird sanctuary within its company-owned forests and is working closely with the Wild Bird Society of Japan to help protect Blakiston’s fish owl (see page 45)

- Held a tree-planting activity at Mt. Nikko-Shirane in 2017 (see page 46)

- Holds the School of Friendship for Forests and Paper within company-owned forests to provide hands-on courses on the natural environment (see page 65)

- Allocates approximately ¥0.6 billion each year to the maintenance of company-owned forests (see page 28)

- Engages in forest management that takes into consideration biodiversity (see page 46)

- Maintains approximately 20% of company-owned forests as environmental forest areas (see page 27)

- Has acquired forest certifications for all company-owned forests (see page 27)

- Allocates approximately ¥0.6 billion each year to the maintenance of company-owned forests (see page 28)

- Engages in forest management that takes into consideration biodiversity (see page 46)

Efforts to use more domestic wood as a raw material for paper

The Nippon Paper Group is working to increase the percentage of domestically produced wood it uses to make paper. Having reached 30% in fiscal 2008, this figure rose to 36.8% in fiscal 2016. We aim to carry on with our efforts to help invigorate Japan’s forest industry by using Japanese timber whenever possible.

Organizing private-sector forest owners in Kyushu

Increasing the competitiveness of Japan’s forest industry requires that forest owners work together to maintain an efficient road network and systematic thinning operations. The signing of a memorandum of understanding on the advancement of forest management in Kyushu by Nippon Paper Industries Co., Ltd., the Kyushu Regional Forest Office; Oji Paper Co., Ltd.; Sumitomo Forestry Co., Ltd.; and others in 2009 set the stage for later developments. In March 2015, for example, an area covered by an agreement concerning the promotion of forest maintenance in the Itsuki region of Kyushu was designated as the site for a consolidation test project with the participation of the Japan Project-Industry Council’s Forestry Regeneration Committee. In a separate development, a forest management and lumber production agreement was concluded for the Yatsushiro region in March 2014. This groundbreaking wide-area model agreement calls for private-sector forest owners to manage forests in Kyushu collaboratively. Participants in the agreement include Kumamoto Prefecture, Yatsushiro City, the Yatsushiro Shinrin Forest Cooperative, and Nippon Paper Co. Ltd.

Case

Development of Large Scion Plantation for Specified Japanese Cedar Mother Trees

In 2016, Nippon Paper Industries Co., Ltd. and Nippon Paper Lumber Co., Ltd. embarked on an initiative to develop a large scion plantation in Hitoyoshi City, Kumamoto Prefecture. This initiative is a bid to facilitate the quick propagation and full-scale production of cutting seedlings from Japanese cedar mother trees chosen for their excellent growth ability and lower pollen counts.

Nippon Paper Industries has developed an exclusive technology that enables it to propagate cutting seedlings much more quickly than is possible with conventional methods. Nippon Paper Lumber intends to use this technology to increase seedling production in line with demand and will proactively market seedlings, making itself into a stable source of cutting seedlings in the Kyushu region and a contributor to the steady renewal of Kyushu’s forests.

Case

Fukushima “Morino Chonai-kai” – Protecting Fukushima’s forests

In Fukushima Prefecture, impacts of the Great East Japan Earthquake have caused forest management and timber operations to stagnate, thereby endangering the watershed and disaster-prevention roles played by forests. Responding to this situation, Nippon Paper Lumber Co., Ltd. and Office Chonai-kai, an environmental NPO, concluded a memorandum of understanding, under which the Fukushima Morino Chonai-kai was launched in July 2016.

Fukushima Morino Chonai-kai comprises a scheme in which Morino Chonai-kai, which was established by Office Chonai-kai in 2005, will be used to promote the thinning operations necessary for protecting forests. These activities will be supported through sales of paper and paper products.

Under a similar memorandum of understanding with Office Chonai-kai, Toppan Printing Co., Ltd. has agreed to produce Fukushima Restoration Support Desktop Calendars and use 150 yen from the sale of each to support forest protection activities in Fukushima Prefecture.

In pursuit of the Fukushima Morino Chonai-kai scheme, Nippon Paper Lumber Co., Ltd. will purchase material from forest thinning operations in Fukushima and use it as raw material for making paper at its Ishinomaki and Iwanuma mills.

Nippon Paper Group Sustainability Report 2017
Recognizing the importance of mutual development the Nippon Paper Group strives to build positive ties with the local communities in and around its forests. We pay particular attention to the concerns of local residents while taking into consideration the cultures and traditions of each region as well as the natural environment and ecosystems. Considerable effort is also placed on promoting educational activities, and creating employment opportunities, within local economies.

- Acquisition of forest certifications (see pages 26-27)
- Engages in forest management that takes into consideration biodiversity (see pages 44-45)
- Coexisting with local communities (Employment support, respect for indigenous people, see page 63)

In similar fashion to the cultivation of crops in the field, the Tree Farm Initiative achieves sustainable procurement of raw materials through repeated cycles of growing and harvesting trees. The Tree Farm Initiative manifests Nippon Paper Industries Co., Ltd.’s concept for overseas afforestation projects.

Presently, the Company oversees 91 thousand hectares (as of December 31, 2016) of afforested areas in Brazil, Chile, Australia, and South Africa.

- Afforestation projects that help the local ecology

The Nippon Paper Group performs afforestation work on grasslands, former farms and pastures and on harvested plantation land. We select species, focusing mainly on fast-growing Eucalyptus, according to individual climatic conditions and materials available for making paper.

In order to maintain a balance between areas planted with Eucalyptus and the biodiversity needs of each region, we implement appropriate measures and keep vegetation along rivers and water courses where the potential effects on the ecology are large.

Environmental Responsibility

The Nippon Paper Group’s social responsibility is to use sustainable forest resources to contribute to the creation of a sustainable society. We protect biodiversity by properly managing forests and help to prevent global warming by making effective use of the ability of forests to sequester CO₂ and by using wood resources efficiently. In transporting raw materials, manufacturing products, and performing other activities that bring our products up to the point of usage, however, we use significant amounts of resources and energy, and generate greenhouse gases and waste. At every stage of the value chain, therefore, we actively work to reduce our environmental impact by, for example, monitoring the effects of our activities to manage them and adopting new technologies and facilities to achieve greater energy efficiency.

Environmental Responsibility

Policy and Management

We are putting in place a Group-wide environmental management system based on our Environmental Charter and engaging in environmentally friendly corporate activities.

Basic Stance

Endeavoring to reduce the environmental impact of our activities taking into consideration the unique characteristics of our business and wide-ranging social issues

To reduce the environmental impact of its production processes, the Nippon Paper Group, in upholding the principles and basic stance expressed in the Nippon Paper Group Environmental Charter, emphasizes environmental performance in selecting equipment and strives to increase daily operating efficiency.

Environmental Management Promotion Structure

Putting in place a group-wide structure

The Management Execution Committee makes decisions on environmental strategy and oversees environmental activities, for the entire Group. Chaired by the executive officer responsible for environmental management, the Nippon Paper Group Environmental Committee applies the philosophy and basic policies of the Environmental Charter, which underpins the environmental management principles of Group companies, by drawing up and monitoring implementation of the Environmental Action Plan, and submitting progress reports to the Management Execution Committee. By deliberating and approving new initiatives, the Management Execution Committee promotes ongoing improvement in the Group’s environmental activities.

The Nippon Paper Group’s environmental management promotion structure (as of March 31, 2017)

- Strengthening environmental management systems
  At the Nippon Paper Group, the environmental departments at our headquarters and production facilities work together to strengthen the environmental management systems.
  Nippon Paper Industries, for example, has adopted a system for centrally managing emissions from the boilers of individual mills. This effort illustrates how the company's headquarters and production facilities work together to ensure compliance with laws and regulations, and reduce environmental impact.

- Introducing environmental management systems
  As one measure aimed at promoting environmental management, the Nippon Paper Group is introducing various environmental management systems including ISO 14001, the international standard for environmental management, and Eco-Action 21. ISO 14001 certifications have been obtained by 93% of the principal production sites of Nippon Paper Industries Co., Ltd. and its consolidated subsidiaries.

Please refer to the following web page for information on conditions with regard to ISO14001 and Eco-Action 21 certifications.

The Nippon Paper Group

Environmental Charter

(Established on March 30, 2001, and revised on March 30, 2007)

Philosophy
The Nippon Paper Group is committed to helping preserve the global environment over the long term and contributing to the development of a recycling based society by carrying out its corporate activities in recognition of the importance of biodiversity.

Basic Policy
1. Act to counter global warming
2. Protect and develop forest resources
3. Increase use of recycled resources
4. Comply with environmental statutes and work to minimize our environmental impact
5. Develop environmentally friendly technologies and products
6. Engage in active environmental communication

Environmental Action Plan (Green Action Plan)

Setting forth specific objectives and actions

The Nippon Paper Group has established its Environmental Action Plan - the Green Action Plan (GAP) – in accordance with the six basic policies expressed in its Environmental Charter. Group companies have each established their own specific environmental action plans to reflect their own individual business circumstances based on the GAP. Their efforts to fulfill these plans are enhancing our ability to accomplish the GAP.

Framework for achieving objectives

- The Nippon Paper Group Environmental Charter
- The Nippon Paper Group’s Environmental Action Plan
- Green Action Plan (GAP)
- Environmental Action Plans of Group Companies

Taking action in a two-pronged approach

In order to reduce the environmental impact of its business activities, the Nippon Paper Group is strengthening environmental compliance by placing equal emphasis on preventing problems and on establishing a framework that ensures all problems come to light.

We were not subject to any form of adverse disposition (revocation of licenses, orders to suspend operation or the use of facilities, or fines) with respect to compliance with environmental regulations in fiscal 2016.

The Nippon Paper Group provides basic to specialized environmental education covering topics such as wastewater treatment plant operation. In addition, the Group encourages employees to participate in external training and take advantage of other opportunities to gain pollution prevention qualifications and expertise.

To help elevate the environmental protection awareness

The Nippon Paper Group places particular emphasis on sharing risk information with local communities in an effort to build strong ties of trust with them. To this end, the Group engages in environmental risk communication with local residents and government authorities, as provided in the Nippon Paper Group Risk Communication Guidelines. In cases such as the installation of large-scale equipment, we also conduct explanatory meetings to provide a better understanding of any impact on the environment from installation work and operation of the installed facilities.

Responses to opinions and complaints

In addition to receiving opinions and inquiries via its website, the Nippon Paper Group has established a complaint and inquiry contact at each of its mills. We have also adopted environmental monitoring systems that encourage input from local residents.

Mills that receive complaints move swiftly to determine possible causes, and take remedial action. In those instances where a permanent solution requires an extended amount of time to implement, all appropriate provisional measures are taken as quickly as possible. With each complaint, the Group takes steps to explain the details of remedial action to be taken and to obtain the necessary acknowledgement.

Introducing equipment and facilities to prevent environmental accidents

Nippon Paper Industries identifies risks of environmental accidents in terms of both probability and potential impact, and introduces the equipment and facilities needed for prevention. Acting to prevent major chemical and oil spills - considered a top priority again in fiscal 2016 - the company took steps like installing liquid containment walls and surface oil detectors.

Environmental audits emphasizing legal compliance and risk control

The environmental management guidelines on pollution prevention issued by the Japanese Ministry of the Environment and Ministry of Economy, Trade and Industry serve as the basis for internal audits by the Nippon Paper Group’s various business locations, and for environmental audits by Nippon Paper Industry’s head office Environment & Safety Department. The latter function as a double confirmation of legal compliance and include inspection of chemical tanks and other facilities to prevent environmental accidents. A system of mutual audits has also been put in place by the Group as an additional step to strengthen compliance and risk control.

Environmental Education and Training

Supporting employees to learn

The Nippon Paper Group provides basic to specialized environmental education covering topics such as wastewater treatment plant operation. In addition, the Group encourages employees to participate in external training and take advantage of other opportunities to gain pollution prevention qualifications and expertise.

Reduction of Environmental Impacts
Ascertainment of our material balance and reducing our environmental impact

Material Balance
Identifying and reducing the environmental impact of our business activities

The Nippon Paper Group engages in a broad range of paper-related and other business activities driven primarily by the Pulp and Paper Division, which accounts for 83% of total net sales. Constituting most of the Group’s material balance in Japan, this division is responsible for approximately 92% of the Group’s water consumption and 96% of its CO2 emissions there.

Woodchips and recycled paper make up the bulk of raw materials used to make paper. After converting these raw materials into pulp, the pulp is diluted with water to produce

2 Biomass fuels and waste fuels
3 Japan only

Material procurement
Timber processing (Chipping)

Afforestation areas and other
Cutoffs and thinned wood
pulp slurry and then formed as wet thin sheets. The water is then removed by drying to make paper. In the pulp and papermaking processes, steam is used as a heat source and electricity as a power source. Pulp and paper mills are equipped with boilers that combust fuel to generate steam, and generators that create electricity with turbines driven by steam.

Unfortunately byproducts of the pulp and paper manufacturing process are effluents containing water contaminants as well as steam containing air pollutants and CO₂. Moreover, the fuels combusted by boilers produce ash waste. With this in mind, the Nippon Paper Group strives to reduce the environmental impact of these pollutants.
Reduction of Environmental Impacts

Measures for Preventing Air Pollution

Using chemical substances and filters to reduce emissions of air pollutants

The Nippon Paper Group uses boilers and turbines to generate power internally at its paper mills. The steam emitted by boilers includes greenhouse gases, nitrogen oxide (NOx), sulfur oxide (SOx), soot, dust, and other air pollutants. To lower its environmental impact, the Group uses denitrification, desulfurization, dust collection, and other equipment to bring these pollutants within regulatory standards and standards agreed upon with local governments.

- **Combustion**: Exhaust gases are mixed with ammonia and other chemical substances to break them down into NOx, nitrogen, and water.
- **NOx removal**: Filters and static electricity are used to remove dust and soot.
- **SOx removal**: Exhaust gases are passed through an absorbent that contains magnesium hydroxide. The absorbent traps sulfur oxide and renders it harmless.
- **Dust/soot removal**: Filters and static electricity are used to remove dust and soot.

Initiatives for Preventing Water Pollution

Lowering discharges of water pollutants through the use of microorganisms

Wastewater from the production of paper contains suspended and organic matter originating from the minute pulp fibers, filler, and other materials that did not remain in the paper. The Nippon Paper Group uses wastewater treatment facilities employing microorganism and other technologies to reduce levels of water pollutants measured, for example, in terms of COD, BOD, and SS levels. Through these measures and pH management, we are keeping pollutant levels within regulatory standards and standards agreed upon with local governments.

Standard wastewater treatment process at Nippon Paper Industries Co., Ltd. paper mills

- **Wastewater from the paper manufacturing process**: Wastewater is collected in a large tank (clarifier), where suspended solids are allowed to settle out.
- **Removal of suspended solids**: Oxygen injected into wastewatee in an aeration tank is used to activate microorganisms that break down organic matter.
- **Removal of organic matter (activated sludge processing)**: Activated sludge (microorganisms and sludge) is settled out in a sedimentation pond, allowing clear water to accumulate at the top of the pond.
- **Removal of the top layer of clear water (activated sludge is reused)**: Clear water separated from the activated sludge is tested to measure COD, BOD, SS, pH, and other levels to confirm that they are within regulatory and agreed standards.

Measurement

Levels of NOx, SOx, dust, soot, and other substances contained in exhaust gases are measured to confirm they are within regulatory and agreed standards.
Presently, we have received no information from either government authorities or local communities that water usage by Nippon Paper Group company mills is having negative environmental impacts. Our operations are posing little risk to water supplies in Japan.

In addition, simple risk assessments performed by third parties have not indicated that water supplies are seriously threatened by our operations.

The raw materials and chemicals used by Nippon Paper Group mills contain almost no heavy metals, trichloroethylene or other soil contaminants. Fiscal 2016 was another year in which there were no instances of contaminated soil generated at Group companies.

Before installation of sound insulation wall (left) and after (right) (Fuji Mill, Nippon Paper Industries)
Climate Change Initiatives
Reducing greenhouse gas emissions at every stage of our business activities

**Basic Stance**

**Working to build a low-carbon society**

Keidanren (Japan Business Federation) and the Japan Paper Association both support the creation of a low-carbon society, and the Nippon Paper Group, as a member of both organizations, actively works to prevent global warming.

The Paris Agreement, signed in 2016, has taken effect and is expected to have a global impact on conditions surrounding the problem of climate change. For its part, the Nippon Paper Group will continue to strengthen measures supporting the creation of a low-carbon society.

- **Three core initiatives**
  
  As a part of our efforts to prevent global warming across every stage of our business activities, we are (1) converting to non-fossil energy by employing boilers that use biomass and waste fuels, (2) conserving energy in each of our production and logistics processes, and (3) managing proprietary forests properly to ensure CO2 absorption/sequestration (see pages 40-42).

**Nippon Paper Group environmental initiatives**

**Prevention of Global Warming**

- Reduction of CO2 emissions from operations
- Absorption of CO2 in proprietary forests
- Fuel conversion
- Energy saving
- Carbon sequestration

**Progress Report for the Green Action Plan 2020 Environmental Action Plan**

**Working to achieve objectives**

In its Green Action Plan 2020 (see page 33), the Nippon Paper Group has established the objective of reducing greenhouse gas emissions 10% compared to the fiscal 2013 level. In fiscal 2016, the first year covered by the plan, we vigorously moved forward with investments aimed at saving energy by, for example, consolidating facilities and updating equipment. As a result, our fiscal 2016 greenhouse gas emissions declined 1.5% compared to the fiscal 2013 level, despite lower production in our paper pulp operations.

**Fuel Conversion Led by the Adoption of Biomass Boilers**

- **Actively using biomass and waste fuels to reduce fossil energy usage**

The Nippon Paper Group has installed two types of boilers—high-efficiency boilers and boilers capable of burning construction waste and other woody biomass fuels; used tires; RPF*; and other waste fuels. Our use of these fuels allows us to reduce our usage of fossil fuels. This fuel conversion initiative helps to prevent global warming and slow the depletion of fossil resources.

As a result of energy saving activities and fuel conversion, the Group’s fossil energy usage ratio in Japan fell to 54% in fiscal 2016, compared to 66% in fiscal 1990.

* RPF (Refuse paper and plastic fuel): Fuel derived from paper that is unusable as recycled paper and from waste plastic.

**Change in fossil energy usage ratio (calories)(Japan)**

**One of the largest corporate users of biomass energy in Japan**

The Nippon Paper Group actively applies biomass energy from sources such as black liquor and construction waste. The amount consumed accounts for up to 7%* of non-fossil energy (excluding nuclear and hydroelectric power) used in Japan. The Nippon Paper Group is one of the largest corporate users of biomass energy in Japan.

* In-house data prepared by Nippon Paper Industries Co., Ltd. using energy supply information (fiscal 2015 finalized information) published by the Natural Resources and Energy Agency.

Development of a new biomass solid fuel
Trees absorb CO₂ as they grow. When woody biomass fuel made from trees is burned, the CO₂ that results is CO₂ that was absorbed from the atmosphere and sequestered as the trees were growing, so there is no net impact on atmospheric CO₂ – woody biomass fuel, in other words, is carbon neutral.

Given this carbon-neutral characteristic of woody biomass fuel, the co-firing of woody biomass is being advanced to reduce the CO₂ emissions of coal-fired boilers. Woodchips and wood pellets, however, cannot be efficiently crushed and there are other issues, for example, with water repellency when stored outdoors.

To address these challenges, Nippon Paper Industries has applied torrefaction technology to carbonize woody biomass at a relatively low temperature to develop a new biomass solid fuel that has pulverization properties similar to those of coal and retains most of its energy value.

Actively adopting energy-saving facilities
Wastepaper pulp used as a raw material for paper includes extraneous material such as glue used in the assembly of magazines. Before this pulp can be used to make paper, therefore, it must be put through a screening process. In the screening process, wastepaper pulp is sent into a vessel through an inlet pipe. Within the vessel, the pulp is filtered through a basket with countless slits. Material too large to pass through the slits remains on the outside of the basket, where it is removed by a revolving agitator.

To reduce its energy consumption, Nippon Paper Industries Co., Ltd.’s Ishinomaki Mill has installed highly efficient filtering facilities that employ lightweight agitators equipped with modified fins to remove extraneous material at low RPM.

This is just one example of how the Nippon Paper Group adopts new facilities or updates existing facilities to continuously improve its energy-saving performance.

Absorbing and Sequestering CO₂ through Proper Management of Company-Owned Forests

Sequestering atmospheric CO₂ in forests and wood products

- Sequestering CO₂ with 181 thousand hectares of forests in and outside Japan

As trees grow, they absorb and sequester CO₂ from the atmosphere. It is widely recognized, therefore, that the proper protection of forests helps prevent global warming.

The Nippon Paper Group manages 181 thousand hectares of forests, 90 thousand hectares in Japan and 91 thousand hectares across four countries abroad. Through sustainable forest management, the Group maintains the CO₂ absorption and sequestration capabilities of trees. These forests, both in and outside Japan, continuously sequester approximately 33 million tonnes of CO₂.

We are helping to prevent global warming not only by restricting CO₂ emissions but also by protecting forests.

Sequestering CO₂ in various wood products

CO₂ sequestered in trees as carbon remains sequestered even after trees have been processed into products like construction materials and paper. Products made from wood, therefore, work to prevent increases in atmospheric CO₂ concentrations. Using wood products and actively recycling wastepaper, in other words, by fixing CO₂ for extended periods of time in products, helps to hold down increases in atmospheric CO₂ concentrations.

Moreover, when wood products like construction materials reach the end of their useful lives they can be used as carbon-neutral biomass fuel, the burning of which does not increase atmospheric CO₂.

Helping to prevent global warming through the cascade-use of wood*

* "Cascade-use" refers to the full use of an individual tree for applications across the quality scale, from ones requiring very high quality to others for which quality is not a consideration, for maximum efficiency in resource usage.
Climate Change Initiatives

Advancing Energy Efficiency in Logistics

Working to promote green logistics

The Nippon Paper Group focuses mainly on the two core initiatives of improving its loading efficiency and shortening transportation distances to reduce logistics-related CO₂ emissions.

**Logistics-related initiatives**

- **Green Logistics**
  - Improving loading efficiency
  - Shortening transportation distances
  - Promoting a modal shift to rail or marine transportation
  - Pursuing direct delivery and joint delivery

**Promoting a modal shift in transportation to secure high loading efficiency**

With a modal shift rate* of 89% in its operations in fiscal 2016, Nippon Paper Industries remains a top performer in the implementation of this transportation approach.

* Modal shift rate:
The percentage of rail or marine (including coastal shipping and ferries) transport in general cargo transported over 500 kilometers.

**Comparison of modal shift rates**

**Working with logistics service providers to shorten transportation distances**

The Nippon Paper Group is working with logistics service providers to bypass warehouses and deliver products directly to customers. This effort is intended to reduce CO₂ emissions by shortening overall transportation distances.

Reducing the total distance by direct delivery from paper mills

- **Customer for whom direct delivery means shorter overall transportation distance**
- **Marine, rail and truck transportation**
- **Warehouse**
- **Paper mill**
- **Direct delivery**
- **Transportation**

Obtaining Green Management Certifications

Green Management Certifications are awarded and registered by the Foundation for Promoting Personal Mobility and Ecological Transportation. Companies that undertake at least a certain minimum level of initiatives based on the Green Management Promotion Manual are eligible for these certifications.

Within the Nippon Paper Group, 16 business locations of 8 Group companies have received Green Management Certification. The Nippon Paper Group is actively implementing ecological driving, vehicle inspection and maintenance, reduction of vehicle disposal and waste generation, proper waste handling and recycling, and other practices consistent with green management.

Environmental Responsibility

Excellence Award Received under the Chiyoda Ward Global Warming Action Plan System

Nippon Paper Industries Co., Ltd. was named a winner of an Excellence Award by Tokyo’s Chiyoda ward. Under its Global Warming Action Plan System, the ward, which has been selected by the Japanese government as an Environmental Model City, assesses the global warming action plans announced by eligible businesses. It then presents awards to the businesses with the best plans. Nippon Paper Industries Co., Ltd. was also named a winner in the Environmental Education Category in fiscal 2012.

For its fiscal 2016 Excellence Award, the Company received particular high praise for its efforts to save electricity and other forms of energy, and for the contributions of its environmental education and internal and external information dissemination efforts toward the development of environmentally aware human resources. Taking this formal recognition by Chiyoda ward as an affirmation of its environmental initiatives, the Company has redoubled its commitment to pursuing various initiatives and information dissemination efforts to protect the environment.

Project for making and selling CfFA®
(Carbon-free Fly Ash), a concrete admixture made with coal ash

In April 2016, Nippon Paper Industries Co., Ltd. began manufacturing and selling CfFA®, a concrete admixture made from coal ash - a byproduct from the coal-fired power plant at the Company’s Ishinomaki Mill.

CfFA® consists of fly ash from which unburned carbon, a material that can have a negative effect on concrete quality, has been removed through a heat modification process.

Beginning in 2016, Australian Paper is putting to work its expanded capabilities to make products incorporating wastepaper pulp and strengthening its relationship with PLANET ARK – the country’s best-known environmental NPO - to contribute to the building of a recycling-oriented society by promoting even greater use of recycled products.

Advancing efforts to make effective use of ash and other manufacturing byproducts (see page 39.)

### Collecting Paper-Pak cartons

Nippon Paper Industries Co., Ltd., a member of the Committee for Milk Container Environmental Issues (an organization composed of container manufacturers and manufacturers of dairy products), is helping to achieve the committee’s goal of increasing the beverage carton collection rate to at least 50% by 2020.

To increase collection rates and promote recycling, the Company’s Paper-Pak Sales Division has conducted three Paper-Pak carton recycling campaigns targeting Group employees. Participation rose on each occasion and employees have come to embrace the campaigns. During a two-month period in 2016, Group employees contributed approximately 16,300 Paper-Pak cartons from their households.

Going forward, we will continue efforts to place collection boxes at Group business locations and promote activities for Paper-Pak carton recycling outside the Group.

### Waste Recycling

#### Making effective use of waste

Advancing efforts to make effective use of ash and other manufacturing byproducts (see page 39.)

### Expanding the production of products made with wastepaper pulp in Australia

Australian Paper, located in the Australian state of Victoria, is that country’s only company manufacturing eco-friendly copier paper – a product that incorporates wastepaper pulp. And, responding to the country’s heightened environmental awareness, the company is increasing its production of eco-friendly products.

In fiscal 2015, Australian Paper began operations at facilities that are capable of producing 50,000 tonnes of wastepaper pulp annually, and it is working to expand and enhance its line of products incorporating wastepaper pulp.

Beginning in 2016, Australian Paper is putting to work its expanded capabilities to make products incorporating wastepaper pulp and strengthening its relationship with PLANET ARK – the country’s best-known environmental NPO - to contribute to the building of a recycling-oriented society by promoting even greater use of recycled products.

#### Expanding the Use of Wastepaper

**Actively promoting paper recycling**

Despite efforts to secure forest resources through sustainable forest management, wastepaper continues to be an important resource for the paper industry. The Nippon Paper Group is promoting paper recycling by working with customers to build wastepaper recycling systems, and by collaborating with citizens’ and industry groups to conduct educational activities on wastepaper collection. The Group has also been working to further expand the use of wastepaper by developing technology for using types of paper that have proven difficult to recycle.

As paper and paperboard demand grows outside Japan, it is becoming more difficult to procure sufficient amounts of wastepaper in Japan. We, however, will continue with efforts to expand both wastepaper collection and the kinds of wastepaper that can be recycled.

#### Case

**Project for making and selling CfFA®, a concrete admixture made with coal ash**

In April 2016, Nippon Paper Industries Co., Ltd. began manufacturing and selling CfFA®, a concrete admixture made from coal ash - a byproduct from the coal-fired power plant at the Company’s Ishinomaki Mill.

CfFA® consists of fly ash from which unburned carbon, a material that can have a negative effect on concrete quality, has been removed through a heat modification process.

Characterized by consistent quality, CfFA® has already been used to make national highway tunnels, breakwater tetrapods, seawalls, and other structures. Going forward, the Company will focus on having CfFA® contribute to disaster recovery and infrastructure construction in the Tohoku region of Japan.

Breakwater tetrapods in a drainage outlet at Nippon Paper Industries Co., Ltd.’s Ishinomaki Mill.
The business activities of the Nippon Paper Group entail the cultivation and utilization of forests and, therefore, have an inherently significant and wide-ranging impact on forest biodiversity. We recognize that the sustainable use of forests is fundamental to our existence and development as a going concern. The basic philosophy of the Nippon Paper Group Environmental Charter (see page 32) states that the Nippon Paper Group will engage in corporate activities that recognize the importance of biodiversity. Our Basic Policies on the Preservation of Biodiversity, established in April 2016, provides guidance for the pursuit of such activities.

In pursing sustainable forest management (see pages 28 and 30), the Nippon Paper Group conducts biodiversity surveys in company-owned forests. We also strive to reduce our impact on biodiversity by, for example, treating wastewater and controlling greenhouse gas emissions in our manufacturing processes.

Basic Policy on the Preservation of Biodiversity
(Established April 1, 2016)

Principle
The Nippon Paper Group, a corporate group to which forest resources are of fundamental importance, appreciates the natural gifts bestowed by biodiversity and, by preserving biodiversity, aims to help create a sustainable society that can continuously enjoy ecosystem services.

Basic Policy
1. Recognizing the protection of biodiversity as a critical social issue, we will work to pursue business activities that are in harmony with the sustainable use of ecosystem services.
2. In supply-chain management, we acknowledge the impacts on biodiversity of cross-border use of ecosystem services, and will manage our ecosystem service usage properly.
3. In an effort to reduce environmental impacts on biodiversity, we will actively work to recycle and save resources.
4. We will promote the development of technologies, products, and services that contribute to the preservation of biodiversity and the sustainable use of ecosystem services.
5. Endeavoring to raise employees’ awareness of biodiversity, and collaborating with stakeholders, we will contribute to the building of a society that nurtures biodiversity.

Formulation of a new basic policy

Pass thriving forests on to future generations

In pursuing sustainable forest management (see pages 28 and 30), the Nippon Paper Group conducts biodiversity surveys in company-owned forests. We also strive to reduce our impact on biodiversity by, for example, treating wastewater and controlling greenhouse gas emissions in our manufacturing processes.
Preserving Blakiston’s fish owl habitat while pursuing business activities – Collaborating with the Wild Bird Society of Japan

In 2010, Nippon Paper Industries entered into an agreement with the Wild Bird Society of Japan where approximately 126 hectares of forestland owned by the company in the Nemuro region of Hokkaido was identified as a sanctuary for Blakiston’s fish owl. This sanctuary is home to three confirmed brances of this endangered species.

In May 2015, we signed a memorandum of understanding* for the pursuit of business activities while preserving Blakiston’s fish owl habitat in company-owned forests located in the Kushiro region of Hokkaido. After collaborative surveys conducted in an atmosphere of mutual trust, we have agreed to standards for methods and timing for continuing lumber production, while also protecting habitat and breeding activity, without establishing protected areas.

* The activities pursued under this memorandum of understanding were presented with a 2015 Biodiversity Action Award by the Japan Committee for the United Nations Decade on Biodiversity.

Blakiston’s fish owl
Standing 70 to 80 cm high and weighing 3 to 4.5 kg, Blakiston’s fish owl is the world’s largest owl, with a wingspan of 180 cm. Formerly numbering over 1,000 and found throughout Hokkaido, Blakiston’s fish owls are now found mainly in the eastern parts of Hokkaido, with confirmed numbers of around 140, making up 50 braces. Blakiston’s fish owl was identified as a national protected species in 1971, and placed on the Red List of critically endangered species by Japan’s Ministry of the Environment.

Conducting biodiversity research overseas (AMCEL S.A, Brazil and Volterra S.A., Chile)

AMCEL S.A., located in the Brazilian state of Amapa, owns approximately 310 thousand hectares of land and has set aside 170 thousand hectares as a conservation area.

Volterra S.A., in Chile, owns approximately 19 thousand hectares of forests and has designated about 5 thousand hectares as protected forests.

These areas are home to large numbers of plant and animal species, many of which are rare or endangered. Protecting them, therefore, is very meaningful. Both AMCEL and Volterra undertake surveys and other initiatives to research and monitor biodiversity in the areas they are protecting.

### Initiatives by afforestation companies in South America

Supporting the activities of the Shirane-aoi wo Mamoru Kai

Shirane-aoi (Glaucidium palmatum: Japanese wood poppy) is designated as a “threatened II” species in the Red Data Book for Gunma Prefecture. To protect and breed this plant species, the Shirane-aoi Preservation Group was set up in December 2000, mainly at the initiative of Gunma Prefectural Oze High School and the residents of the village of Katsushika in Tone-gun, Gunma Prefecture. As recognition of its achievements to date, it received the Greenery Day Minister of the Environment’s Prize for Meritorious Service Related to the Natural Environment in April 2014.

Since its inception, Nippon Paper Development, which manages Nippon Paper Industries’ Sugenuma Forest, has supported the operation of the Shirane-aoi Preservation Group, and Nippon Paper Industries has offered a portion of the Sugenuma Forest as a plantation site for Shirane-aoi. Since 2002, the Group has called for volunteers to participate in planting, seed collection, and other activities.

Contributing to the protection of a variety of plant species

Applying proprietary technology

Nippon Paper Industries Co., Ltd. is working to protect precious plant species. It does this by using a proprietary technology that encourages cuttings to take root in containers kept in a special cultivating room.

This technology encourages rooting by using a special cultivating room and cultivation containers to create ideal conditions for photosynthesis. It has proven effective even for producing seedlings of species that have been difficult to propagate with traditional methods. Nippon Paper Industries, therefore, is using it to propagate endangered plant species, to create offspring of beloved sakura trees in various places throughout Japan, and to undertake other initiatives that help to protect biodiversity and preserve history and culture.

Even plant species that normally fail to root by cutting are able to root

Case

Case

Agreement for Citizen-Participation-Based Forest Management -Collaborating with the Iriomote Island Ecotourism Association

In August 2017, Nippon Paper Industries Co., Ltd. entered into an agreement with the Okinawa District Forest Office - the local arm of the Forestry Agency’s Kyushu Regional Forest Office - to carry out forest conservation activities such as the eradication of non-native plants in the approximate 9 ha of national forest on Iriomote Island. At the same time, the Company concluded an agreement regarding collaborative activities with the Iriomote Island Ecotourism Association, an NPO that has been working to preserve the natural environment and traditional culture of Iriomote Island since 1996.

Iriomote Island is covered with highly diverse forests, including Japan’s largest mangrove forest and subtropical broad-leaved trees, providing a habitat for precious animal and plant species. One such species is the Iriomote wild cat, which has been designated a special national treasure and is listed as an endangered species IA. However, large numbers of invasive non-native plants have been found over an extensive area of the island.

Nippon Paper Industries will collaborate with the Iriomote Island Ecotourism Association to promote forest conservation activities, harnessing the experience the Company has developed over many years of managing its own forests throughout Japan and through its collaboration with the Wild Bird Society of Japan to protect the Blakiston’s fish owl (an endangered species type IA) in a company-owned forest in Hokkaido.

Agreement signed with the head of the Okinawa District Forest Office

Responsibility to Customers

Stakeholder opinions are critical for bringing to our attention issues that are important for coexisting with society and growing sustainably.

We now receive large numbers of customer questions regarding environmentally and socially conscious raw material procurement and product development.

The Nippon Paper Group is committed to providing products that respond to customer concerns and desires.

The Nippon Paper Group engages in a broad spectrum of businesses including paper, films, healthcare products, chemical products, lumber, and construction materials, to serve a wide range of both corporate customers and consumers as it continues to develop and grow in tune with society.

Providing stable supplies of products that are indispensable to everyday life, and applying the Group’s strengths to develop products that please customers, are how we fulfill our basic responsibility to play a useful role for society. Assuring quality and safety, we will continue to live up to the trust society places in our products and services.

The Nippon Paper Group engages in proactive communication to identify customer needs across a wide range of areas. We receive numerous inquiries from customers about the tree species, countries of origin, and legality of our raw materials. In response, we explain measures we have put in place to address these matters and provide information on third-party evaluations of our activities (see page 27).

We also actively welcome customers for inspections and tours of mills and plants to give them a first-hand view of production facilities and, thereby, gain their understanding of our production activities.

Nippon Paper Industries’ Paper-Pak Sales Division conducts technical lectures for customers (dairy and beverage companies) providing them with information on how to properly use filling machines. At the same time, the division continuously strives to improve its products based on valuable feedback from customers.

Nippon Paper Industries aims to help enrich daily life through packaging made from woody biomass. One of the products we are developing, the SHIELDPLUS® series of paper-based packaging materials with outstanding barrier properties, was the only paper-industry product included by Japan’s Ministry of Agriculture, Forestry and Fisheries in a collection of examples of highly functional containers and packaging that reduce food loss. Nippon Paper Industries is committed to working with processing companies and product manufacturers to provide the world with innovative packaging material and new processing technologies.

Nippon Paper Crecia Co., Ltd. conducts surveys to gather data on customer satisfaction and needs, and then uses what it learns to create measures of success in serving customers.

The Nippon Paper Group has established its New Product Development Committee to accelerate business structure transformation (see pages 10-11). New product development teams operating under the committee identify research themes and present them in committee meetings held every three months. For themes approved by the committee, formal projects are established and provided with human, financial, and other resources.

The committee is chaired by the General Manager of the Corporate Planning Division and its membership is composed of the president of Nippon Paper Industries and the other members of the Management Execution Committee (see page 16). Depending on the meeting agenda, presidents of subsidiaries or affiliates, and heads of relevant divisions, may participate in committee meetings in order to speed progress toward commercialization.

Each Group company actively promotes efforts aimed at acquiring ISO 9001 certification and engages in quality management suited to the characteristics of its products. Nippon Paper Industries’ Paper-Pak Sales Division performs annual quality audits of production companies. Audits are performed by a team which includes the division head and are a part of efforts to pursue continuous quality improvement based on identified actual conditions (including the “5Ss”) in production facilities.

In addition to the quality audits, production companies also undergo food sanitation investigations focusing in particular on measures for dealing with critical microorganisms, foreign matter, and pest control.

The 5Ss mean sorting, setting in order, shining, standardizing, and sustaining, respectively. The 5Ss are used to maintain or improve workplace environments.
Quality assurance systems in the paper and paperboard divisions

Nippon Paper Industries has adopted a Service Engineer (SE) system to shorten the distance between customers and production facilities. Under this system, SEs listen directly to customers’ voices. They do this, for instance, by visiting customers and conducting quality patrols in which they observe printing and processing lines where paper is used. To create even closer customer relationships, we revamped our quality assurance systems in 2013, assigning technical experts to sales divisions. In addition, to enable swift responses to diverse customer needs, regular quality-information meetings and other means are used to promote collaboration between sales and technical divisions.

Responding to instances of defective products

For defective products, action is taken by individual Group companies.

In the Paper and Paperboard Division of Nippon Paper Industries Co., Ltd., for example, sales technicians act as the central contact point, working with the relevant mill and head office departments to develop solutions by using tools such as a database of safety-related problems.

At Nippon Paper Crecia Co., Ltd., which sells consumer products, contact information for the Customer Service Office is provided on all products and the Customer Service Office itself is placed directly under the president to ensure that all issues raised by customers are reported. Furthermore, the company’s website is configured to accept customer queries and comments. The company consistently acts in good faith to ensure that customers are fully satisfied.

Product defect response system (Paper and Paperboard Division)

Verification and audit of wastepaper pulp blending ratios and use of thinned wood

Nippon Paper Industries has established a management system for providing customers with guarantees that products are made with a certain percentage of wastepaper pulp content and with wood from forest thinning.

Steps are taken to manage and review production procedures at each of the Group’s mills, based in part on the standards and criteria of the ISO 14001 environmental management system. The proper operation of content management systems is confirmed in internal and external audits, and customers verify that products are being manufactured to content specifications.

The Stable Supply of Products

Stable supply systems optimized by product

To secure on-demand-supply, we devote considerable effort to maintaining stable production by securing reliable procurement of raw materials, and systematically maintaining and upgrading our production facilities. Sales departments and production units coordinate their activities to provide customers with reliable supplies of products by developing flexible production plans that avoid waste, and managing inventories appropriately.

Stable supply of newsprint

Newspapers are a highly public information medium, so the need for the stable supply of newsprint is especially strong. The paper industry, therefore, has prepared regional emergency manuals for use when supply operations cannot be conducted in the usual manner.

In the event of a disruption to communication and transportation systems as a result of a major disaster, paper companies follow these manuals to ensure the smooth supply of newsprint.

Addressing natural disaster risks

The Nippon Paper Group, having learned much from past natural disasters, has developed practical guidelines for addressing natural disaster risks. Working from these guidelines, each mill and plant has examined its natural disaster response measures and revised its disaster response manual.

For its part, Nippon Paper Industries, in preparation for a major disaster that could disable its headquarters, has established a backup facility that could immediately take over headquarters functions. The company also conducts training in the transfer of functions from its headquarters to the backup facility.

Business continuity management system

Nippon Paper Industries’ Paper-Pak Sales Division has developed its own business continuity guidelines and established its own management system, so that it can maintain production even in times of emergency. The division is moving ahead with procurement of key raw materials from multiple manufacturers. It has also diversified its production across multiple production sites to lower its disaster risk exposure. In fiscal 2016, emergency-response education and training were conducted at the head office and production sites.
Enhancement of Product Safety
Responding to customer faith by establishing the Product Safety Management System to enhance safety

Establishing a Group system
The Nippon Paper Group Product Safety Committee, chaired by the General Manager of Nippon Paper Industries Co., Ltd.’s Technical & Engineering Division oversees all activities concerning product safety. The committee deliberates and makes determinations on important matters concerning product safety policies and activities.

Reporting directly to the committee, the Product Safety Subcommittee monitors and manages activities at each Group company. Drawing on information and the exchange of opinions among Group companies, the subcommittee also deliberates on optimal responses to matters of concern and submits its findings to the Product Safety Committee. Each Group company establishes its own product safety committee and engages in appropriate product safety activities.

Approach toward Product Safety

System for legal and regulatory management and compliance
The Nippon Paper Group, acting in compliance with laws, including Japanese laws such as the Act on the Evaluation of Chemical Substances and Regulation of Their Manufacture, PRTR Law, and Food Sanitation Act, works to ensure product safety by employing management approaches adapted to the characteristics of particular operations and products.

Product safety management approach

Philosophy and Basic Policy on Product Safety
(established on October 1, 2004, revised on August 1, 2014)

Philosophy
We pledge to work to improve safety at every stage of the life cycle of our products, from design to manufacture, supply, and disposal, and to provide products and services that the public can trust.

Basic Policy
1. To provide safe products and services in response to the continued trust of our customers.
2. To respect related laws and standards in order to guarantee the safety of our products and services. We pursue safety not only as expected under Japanese laws but also from a global perspective.
3. To provide customers with precise information on the safety, features, and correct usage of our products.
4. To set up a product and service safety management structure and ensure that all group employees have a thorough awareness of the importance of product safety.

Halal certification obtained
In March 2017, Halal certification was obtained for the nucleic acid (RNA-M) and dissolving pulp produced at the Gotsu Mill. Halal certification enables exportation of these products to Islamic countries. Preparations to gain the certification for CMC (carboxymethyl cellulose) are currently underway.

Halal certification
Halal certification is presented for products that, upon inspection of raw materials, production processes, ingredient and product storage conditions, and other matters, have been determined to be in keeping with Islamic law. Products exported to Islamic countries should be Halal certified.
Considering every stage of the product lifecycle

Nippon Paper Group products use wood raw materials - renewable biomass resources – and are recyclable. Building on the fact that our products have a low environmental impact by their very nature, we strive to develop products that are cognizant of the environment at every stage beginning with raw material procurement and proceeding through production, consumption, post-consumption, and disposal.

Development of Environmentally Friendly Products

Environmentally Friendly Raw Materials Procurement

The forest certification system is composed of two components—the Forest Management (FM) component, which certifies that forests are sustainably managed from environmental, social, and economic perspectives, and the Chain-of-Custody (CoC) component, which certifies that products from certified forests have been properly processed and distributed. The Nippon Paper Group has obtained CoC certifications at its principal mills, and provides certified paper products.

Providing certified paper by starting with properly managed forests (Nippon Paper Group)

In fiscal 2016, Nippon Paper Industries Co., Ltd. completed development work on SPOPS®, a replaceable paper container designed to take the place of plastic pouches for refills of shampoo and other products. Commercialization efforts for this new product are now moving forward. With SPOPS®, there is no need for pouring from a pouch into a dispenser; product refills are accomplished simply by replacing a cartridge. PAPER-PAK manufacturing technology is what makes the SPOPS® approach to product refills possible. SPOPS® makes daily life more convenient by simplifying refills. And because it uses paper - a recyclable material – and contributes to greater efficiency in distribution, SPOPS® also has a lower environmental impact than do plastic pouches.

Refilling with SPOPS®

"SPO!" is the sound made when an empty SPOPS® cartridge is separated from the dispenser. "PS!" is the sound made when a new cartridge is installed in the dispenser. Together, they form the product name “SPOPS.”

Case

**SHIELDPLUS** oxygen- and flavor-barrier materials (Nippon Paper Industries Co., Ltd.)

Nippon Paper Industries Co., Ltd. is developing SHIELDPLUS, an environmentally friendly packaging material made from paper, which is recyclable and ultimately renewable.

Performing as well as existing products, SHIELDPLUS offers outstanding barrier properties and is seen as a substitute for aluminum and barrier-film options. As a replacement for aluminum, SHIELDPLUS enables the use of metal detection devices for inspection procedures. As a replacement for barrier film, SHIELDPLUS reduces the use of plastic, which is made from petroleum, a depletable resource. It, therefore, results in lower CO2 emissions, from manufacturing through disposal, than do conventional packaging materials made only from plastic.

In addition to its outstanding barrier properties, SHIELDPLUS offers environmental benefits that make it appropriate for use under a wide range of circumstances and for various types of packaging applications.

**Examples of SHIELDPLUS applications**

2. Post-use environmentally friendly disposal

**Case**

**MinerPa™** - A new, recyclable material made from wood fiber with a high mineral content (Nippon Paper Industries Co., Ltd.)

In January 2017, Nippon Paper Industries Co., Ltd. completed development of MinerPa™, a new functional material with mineral particles densely bonded onto the surface of wood fiber. In so doing, it has succeeded in creating a product that retains the reusability and thermal recyclability of wood fiber while also offering various functions and characteristics of minerals. Going forward, attention will focus on application development and commercialization in areas such as fire-resistant and radiation-shielding construction materials, and nursing-care and sanitary products for which deodorizing and antibacterial functions are required.

**Surface of MinerPa™ fiber**

Providing Products that Help to Overcome Challenges for Society

3. Responding to changing quality demands

**Case**

**Super Jet Fiber** insulation material (Nippon Paper Lumber Co., Ltd.)

Nippon Paper Lumber manufactures Super Jet Fiber, a residential heat insulation material that, because it is made primarily of recycled newspapers, is close to a natural material.

As a blown-in thermal insulation material, Super Jet Fiber offers the benefits of low environmental impact and high insulating efficiency, which have made it increasingly popular for use in ZEH (net zero energy houses).

**Super Jet Fiber (Insulator)**

4. A product line for a wide range of needs (Nippon Paper Crecia Co., Ltd.)

Nippon Paper Crecia goes to great lengths to develop products that respond to customer needs. It pays meticulous attention to feedback received through its Customer Service Office and sales channels, and works to develop products that meet newly emerging needs and performance demands.

Policy and Management

Building a healthy and safe workplace environment in which employees, who serve as the driving force behind the Group’s corporate activities, can take full advantage of their individual capabilities while conforming to the highest ethical standards.

Focusing on the optimal application of diverse human resources while ensuring safety and disaster prevention

The Nippon Paper Group respects human rights and aims to develop a working environment that makes the most of a diverse range of human resources. Work-style reform, for example, has gotten much attention in recent years, and we are moving proactively to help ensure that employees can maintain work-life balances that suit them.

We also make every effort to maintain and enhance safe working environments and to take all appropriate measures for safety and disaster preparedness.

Philosophy and Basic Policy

Aiming to be a company where employees can look to a better future

Gaining the trust of society and fulfilling our responsibilities requires that Nippon Paper Group employees act with high morals and strong motivation. Promoting employee awareness and behavior consistent with that belief, helping individual employees improve their capabilities, and rewarding performance are among our most important responsibilities. The Group established its Philosophy and Basic Policy on Human Rights, Employment and Labor based on this understanding.

Initiatives in Respect of Human Rights

Confirming, verifying, and educating with the help of a third-party perspective

Exchanging opinions with Amnesty International Japan

In 2014, divisions in charge of procuring wood chips and managing labor relations at Nippon Paper Industries each met with Amnesty International Japan to share opinions. The meetings helped us to deepen our understanding of global trends in human rights issues. They also gave us an opportunity to explain and discuss conditions at the company and prioritize our actions going forward.

Later, in fiscal 2015, we embarked on an examination of human rights conditions at subcontractors in Japan and at overseas chip suppliers. Based on examination results, we are making changes by employing PDCA cycles as we continue our dialogue with Amnesty International Japan.

Paying attention to human rights issues at affiliated companies in Japan

In fiscal 2015 and 2016, Nippon Paper Industries Co., Ltd. examined human rights issues at affiliated companies in Japan. Fiscal 2015 was set aside for self-examinations and the results of that work were summarized in reports, and responses to issues were considered.

Concern for human rights across the supply chain

Concern for human rights and labor across the entire supply chain is clearly defined in the Nippon Paper Group’s Philosophy and Basic Policy Concerning Raw Materials Procurement, and the Group conducts supplier surveys and interviews regarding these concerns (see pages 24 and 27). Furthermore, employees responsible for procurement perform on-site checks of human rights conditions. These were conducted in South Africa in fiscal 2015 and in Australia and Vietnam in fiscal 2016. Each, supplemented with interview results, provided information on matters such as health, hygiene, safety, disaster preparedness, and local environmental concerns. In managing forests, the Group devotes significant attention to protecting the culture and traditions of residents in each region of its overseas afforestation operations (see page 30).

Education and training

In pursuit of personnel management cognizant of human rights, the Nippon Paper Group has employees responsible for personnel matters participate in training courses hosted by government agencies. The Group is also conducting human rights education for personnel in charge of CSR, new hires and newly appointed managers.
Occupational Safety and Health

By working daily to uncover inherent risks, maintaining a workplace environment in which employees can go about their duties without undue anxiety and security measures.

At Nippon Paper Industries, labor and management occupational safety and health meetings are held once each year. The persons responsible for occupational safety and health from the head office, mills, and labor union come together to discuss a variety of issues, including the annual occupational safety and health management plan. Safety and health committees are also established at each mill and office. These committees deliberate on and determine important management matters and activity policies. Employees are notified of the details of decisions through department meetings and internal mill newsletters and then execute the determined activities.

System to promote occupational safety and health

The Nippon Paper Group has established the Safety and Disaster Prevention Committee, which coordinates Group-wide occupational safety and health, disaster prevention and security measures.

Examples of organizations for safety

- Occupational safety and health management system
  - In 2009, the Nippon Paper Group implemented its own system for continuously pursuing occupational safety and health management activities at the organization level. Under this system, a three-tiered approach is used for risk assessments by employees and at the management level, and information on risks and management measures, such as mutual risk assessments within a business location, is shared. To raise safety standards across the Group, events are held to share expertise in performing risk assessments.

- Mill safety audit system
  - The Nippon Paper Group conducts mill safety audits to raise the level of safety management. In addition, mutual safety audits among the Group companies were introduced in 2010. Audits are being improved from the bottom up by promoting closer communications within the Group.

### Basic Stance

### Securing safety and health, and preventing disasters

Providing a safe work environment is a basic responsibility of any business. In fulfilling this responsibility, the Nippon Paper Group advances initiatives focused on safety and health, and disaster preparedness.

Maintaining an unwavering daily commitment to uncovering and minimizing risks is key to that effort. Consistently engaging in sound management while responding to the trust of employees is also important for building a pleasant and comfortable workplace that helps to maintain and improve employees’ health. We have created labor safety and health systems and continuously strive to prevent accidents and provide safe, pleasant working environments, based on the Philosophy and Basic Policy on Safety and Health Measures established in 2004.

#### Philosophy and Basic Policy on Safety and Health Measures

**Philosophy**

- In addition to acknowledging that it is the company’s duty to guarantee safety and health, and to strive to develop pleasant, improved working conditions, we pledge to work ceaselessly to prevent any and all accidents, minor or major.

**Basic Policy on Safety and Health**

1. To respect the Industrial Safety and Health Law.
2. To establish self-imposed standards and step up daily management.
3. To set up a management structure and clearly define roles, responsibilities, and authority.
4. To strive to improve safety and health training.
5. To develop and maintain a safe, pleasant working environment.

**Basic Policy on Safety and Risk Prevention**

1. To respect laws and regulations pertaining to safety and risk prevention.
2. To establish self-imposed standards and step up daily management.
3. To set up a management structure and clearly define roles, responsibilities, and authority.
4. To strive to improve safety and risk prevention education and training.
5. To work in cooperation with related government and local communities and share information.

### System to Promote Occupational Safety and Health

**To build a safe workplace environment**

The Nippon Paper Group has established the Safety and Disaster Prevention Committee, which coordinates Group-wide occupational safety and health, disaster prevention and security measures.
Occupational Safety and Health

Eliminating occupational accidents

In fiscal 2016, the Nippon Paper Group (including subcontractors) experienced no serious occupational accidents and its frequency rate for occupational accidents requiring time off from work came to 0.39, with an occupational accident severity rate of 0.03. Despite a decrease in occupational accidents among Group employees, there was no decline in accidents involving employees of subcontractors and other companies performing work at Group production sites. To help ensure the safety of all workers, we are taking steps to enhance communication and coordination with subcontractors and other companies and devoting even greater attention to safety patrols and the provision of education and guidance.

In-plant safety measures

Based on its mission of eliminating all personal injuries within its mills, Nippon Paper Industries has implemented safety patrols and education initiatives in collaboration with the labor union and subcontractors. In safety patrols, we provide instructions and guidance for immediately correcting unsafe conditions. As a principal employer, we also provide information, reference materials, venues, and other resources, and have confirmed that subcontractors are conducting safety education properly. Furthermore, we enhance workplace safety by providing guidance on, and encouraging voluntary efforts, including risk prediction and risk assessment before engaging in work.

Natural disaster and fire countermeasures

In preparation for natural disasters, each location of the Nippon Paper Group has created disaster preparedness manuals reflecting local hazard map information and the characteristics of their particular operations and geographic location. They also cooperate with local fire departments and other public safety authorities to conduct regular disaster preparedness training.

At Nippon Paper Industries, individual business locations undergo regular disaster prevention surveys by a company specializing in risk assessment.

Traffic safety initiatives

The Nippon Paper Group actively participates in traffic safety education and in various traffic safety campaigns of local police authorities. Every effort is made to ensure that all employees remain conscious of the need to drive safely.

Efforts regarding Hygiene and Health

Taking into consideration the importance of mental and physical health

The Nippon Paper Group strives to keep its employees healthy and to detect health problems in their early stages. For example, at Group companies that are members of the Nippon Paper Industries Health Insurance Union, examinations focusing on lifestyle diseases are performed together with regular physical examinations. In addition, industrial physicians regularly visit workplaces and the Group uses the results of these visits in efforts to improve working environments. The Group also provides medical examinations for the spouses of employees.

Efforts regarding Safety and Disaster Prevention

Working steadily from various angles

Safety education

In its efforts to ensure high safety awareness, the Nippon Paper Group places considerable weight on safety education for all employees, including those in management.

Nippon Paper Industries puts in place an annual Occupational Safety and Health Management System plan at each of its mills and offices, which then implements various education programs covering every stage of an employee’s career from initial hiring through to supervisor training. Constantly renewing safety awareness, we are endeavoring to achieve accident-free workplaces.
Creating Workplaces that Support Diverse Human Resources

With a deep respect for fundamental human rights and the unique characteristics of each individual, the Nippon Paper Group consistently recruits new graduates and actively employs women and people with disabilities.

**Basic Stance**

**Developing a dynamic organization where diverse employees can demonstrate their capabilities**

Employees with different personalities stimulating one another and helping each other deepen their knowledge serve to invigorate the workplace. Amid forecasts of a drop in Japan’s working-age population, diversification of workforces is becoming increasingly vital to ensuring ongoing growth. Our aim is to be a vigorous organization emphasizing the spirit of Challenge, Fairness, and Teamwork - the values included in the Group Mission we definitively stated in 2015.

**Recruitment and Employment**

**Advancing discrimination-free hiring**

The Nippon Paper Group employs over 13,000 employees in and outside of Japan. In its efforts to fulfill its responsibilities to communities, the Group strives to ensure stable employment while continuously recruiting new employees.

Furthermore, based on its Philosophy and Basic Policy on Human Rights, Employment and Labor, the Group promotes discrimination-free recruitment and employment. The Group employs a selection process that bases decisions on test and interview results. Factors including nationality, place of birth, gender and level of school completed have no place in selection decisions.

- **Hiring of people with disabilities**
  With uneven hiring performance at its various business sites, Nippon Paper Industries Co., Ltd. did not achieve the statutory 2.0% employment rate for people with disabilities. To achieve a steady improvement in performance, action plans for hiring people with disabilities will be developed and executed at individual business sites.

- **Promoting the employment of elderly persons**
  The Nippon Paper Group has implemented its Reemployment System to respond to the needs of a super-aging society and to facilitate the passing on of skills. In fiscal 2002, Nippon Paper Industries introduced a reemployment system to allow employees to work up to the age of 65. And in response to the amended Law Concerning Stabilization of Employment of Older Persons, in effect from April 2013, the Company prepared new rules that allow employees of retirement age to continue working based on their desire and skills, at least until they begin to receive pensions.

1 Beginning with fiscal 2014, figures cover consolidated companies in Japan and management employees. Until fiscal 2013, figures covered only non-management employees at Nippon Paper Industries.
2 Depending on staffing conditions and other factors, the company may request employees to continue working beyond the retirement age, and some employees have agreed to do this. This is why the number of people reemployed sometimes exceeds the number of retirees requesting to be reemployed.

---

**Human Rights, Employment and Labor Responsibility**

- **Creating Workplaces that Support Diverse Human Resources**
- **Occupational Safety and Health**
- **Human Rights, Employment and Labor Responsibility**
Creating greater opportunities for women

Organizational invigoration, and securing human resources against the backdrop of a declining birthrate, are two considerations that add to the importance of giving women opportunities to succeed in the workplace. The Nippon Paper Group, with the establishment of a Human Resources Planning Office in fiscal 2015, is creating conditions that promote their participation here.

Diversity seminar (Nippon Paper Industries Co., Ltd.)

Creating work environments that embrace diversity and enable women and all other employees to exercise their full potential is essential for maintaining and strengthening competitiveness. Nippon Paper Industries Co., Ltd., therefore, held a diversity seminar in September 2016 to provide managers with an opportunity to examine the importance of promoting diversity.

In the first part of this two-part seminar, representatives from the CSR Division and the Human Resources Planning Office of the Personnel Dept. provided an overview of social trends and the Company’s career development initiatives for women. In the second part of the seminar, Naoko Ishihara, the then editor-in-chief of Works magazine, published by the Recruit Works Institute, gave a talk on why maintaining and strengthening competitiveness relies on diversity in work approaches for all employees. Over 100 managers participated in the seminar and, based on their enthusiasm in asking questions, found that it provided much to think about.

Responding to the Act on Promotion of Women’s Participation and Advancement in the Workplace

In working to create conditions that enable women to advance their careers, Nippon Paper Industries Co., Ltd. established in April 2016 an Action Plan based on the Act on Promotion of Women’s Participation and Advancement in the Workplace.

Action Plan based on the Act on Promotion of Women’s Participation and Advancement in the Workplace
(Adopted by Nippon Paper Industries Co., Ltd. in April 2016)

1. Make women at least 25% of new graduate hires for career-track positions.
2. For career-track women hired 8 to 12 fiscal years ago, achieve an average continuous employment rate that is at least 80% that of the rate for men.
3. To expand the range of roles performed by women at production sites, identify issues that would arise with the assignment of women to each workplace, consider solutions for these issues, and develop concrete plans for the workplaces to which women will be assigned.

* Women who joined the company during the fiscal years 2004 to 2008.

Female management participation and recruiting

At Nippon Paper Industries a large proportion of jobs is in mill settings and so low recruitment of women in the past is a major reason for their low participation in our management ranks now. To remedy this situation, and double the participation of women in management by fiscal 2020, we are expanding the range of workplaces to which women are assigned.

Follow-up system

At Nippon Paper Industries Co., Ltd., female career-track employees are organized in a network that spans the company, crossing organizational unit and workplace boundaries. Within the network, veteran employees collaborate with the Human Resources Planning Office to help their younger colleagues address concerns and build careers. In addition, we conduct career training aimed at helping female career-track employees overcome career building challenges with the assistance of their immediate supervisors.

Female career-track employee network
Promoting Work-Life Balance

Realizing a balanced workplace environment
The Nippon Paper Group strives to establish an ideal workplace environment that allows employees to reach their full potential while balancing work and family needs. Nippon Paper Industries, for example, has introduced flextime work hours for its head office, research facilities, branches, and the administrative sections of its mills.

Work-style reform approaches
To encourage work-style reform, Nippon Paper Industries Co., Ltd. is striving to reduce the overall number of hours workers spend on the job. The Company believes that helping individual employees maintain a desirable work-life balance will result in more vibrant working environments and that the time and energy employees gain will ultimately result in added growth for the Company.

Helping employees balance work and child care
The Nippon Paper Group revised its action plan, in April 2016, and strives to support its employees in maintaining work and child-care balance in accordance with Japan’s Act on Advancement of Measures to Support Raising Next Generation Children.

As one example, Nippon Paper Industries has implemented systems that exceed the provisions stipulated under Japan’s Child Care and Family Care Leave Act. This includes extensions to the exemption period for overtime working hours, the application period for child care and paid leave for child rearing. Based on these actions, we have been designated by Japan’s Minister of Health, Labour and Welfare as a company that supports child rearing and have obtained the right to display the Kurumin mark.

Support for the improvement and exercise of professional skills
The Nippon Paper Group has identified five key elements for providing employees with equal opportunities for learning and for creating a framework enabling ambitious, capable individuals to further enhance their skills.

(1) Support for self-development and voluntary skill acquisition
The Nippon Paper Group supports employee self-development and voluntary skill acquisition through means such as group training and rewards for acquiring professional qualifications. In addition, job-level-based training, such as that for new hires and new managers, is conducted jointly by Group members to promote the development of employees throughout the Group. And training is pursued from a broad perspective; job-level-based training at mills, for example, is conducted not just for a single mill but together with neighboring mills.

Furthermore, Group employees can meet self-determined skill needs by taking any of approximately 150 correspondence courses and joint training. Every employee is offered not only the ability to choose courses they want to take but also precious, mutually stimulating opportunities for joint training with colleagues from other Group companies.

Training time for individual employees
(Consolidated companies in Japan)
7.6 hours/year

(2) Assignment of the right people to the right positions
Nippon Paper Industries periodically surveys employees to ascertain what kind of job assignments they wish to have. Based on the results of these surveys, every effort is made to match employee strengths with job types.

In addition, the Nippon Paper Group has implemented an internal recruitment system. Under this system, individual employees can consider their skills and how they want to develop their career, and then apply for a position posted by a Nippon Paper Group member.

(3) Development of employees capable of acting on a global stage
Nippon Paper Industries and other Group companies have put in place programs such as one for overseas study. This program is supported by the dispatch of personnel to overseas education institutions and by overseas assignments to the various offices of Nippon Paper Group. Through actions such as this, the Company is striving to strengthen awareness and education, so that all of its career-track employees will be capable of taking on overseas assignments.

1 Data scope: Consolidated companies in Japan
2 Data scope: Non-management employees of Nippon Paper Industries
Human Rights, Employment and Labor Responsibility

Creating Workplaces that Support Diverse Human Resources

**Case**

Adoption of an overseas internship / training system

As part of its effort to develop human resources capable of undertaking overseas assignments, Nippon Paper Industries Co., Ltd. has adopted an overseas-company internship system for administrative employees. The goal of this system is to boost employee interest in working overseas by having them experience daily life and culture while working for a period of one month at an overseas company (mainly in Asia) that is not a member of the Nippon Paper Group. In fiscal 2016, the first year of the program, 11 employees participated in internships in three countries.

**Case**

Implement small group activities globally

The Nippon Paper Group is implementing small group activities in and outside Japan. The purpose of these activities is to achieve improvements in areas such as operations, quality, and costs. In fiscal 2016, Nippon Paper Industries Co., Ltd. held its 24th company-wide presentation meeting, while the Group held its eighth presentation meeting, with participation by 10 Group companies located in Japan and overseas. The presentations helped attendees to better understand their own workplaces and consider good practices from other workplaces in Japan and abroad.

(4) Reinforcement of production frontline capabilities

Human resource capabilities at the production frontline represent the heart of the manufacturing process. The Nippon Paper Group passes on to each generation the technologies and skills nurtured over a lengthy period to maintain and improve the capabilities of its human resources.

Nippon Paper Industries created a committee to strengthen frontline capabilities in fiscal 2006. Nippon Paper Industries has organized and is operating systems under which technologies and skills that should be carried forward at individual production sites are identified, and training is prioritized based on analyses of the strengths and weaknesses of, and skills needed by, individuals.

(5) Support for the planning of lives and careers

Given the hike in the public pension eligibility age and increasing diversification of lifestyles, employees must consider a number of factors when planning their careers and life after retirement. Therefore, core companies within the Nippon Paper Group offer Life Plan Seminars to enhance employee understanding of each company’s and the government’s programs, as well as the need to develop meaningful life plans that include health management.

**Fair Evaluation and Compensation**

Evaluation based on skills and performance

As part of its efforts to practice fair and transparent personnel evaluations, Nippon Paper Industries lays out clear evaluation criteria and conducts review sessions, in which managers provide feedback on performance evaluations, for all non-management employees. Review sessions are an opportunity to ensure that employees understand and accept evaluation results and for setting the skill development direction for individual employees. For decisions on promotions to management and other positions, the assistance of outside companies specializing in human resource assessment is called upon to enhance objectivity.

**Industrial Relations**

Improving the workplace environment through labor and management consensus

The Nippon Paper Group strives to maintain a sound relationship with its employees. Labor unions have been formed at Nippon Paper Industries and the majority of its consolidated subsidiaries. Irrespective of the existence of a labor union, however, every effort is made to maintain smooth industrial relations at all Group companies.

For example, under the common objective of building a better company, Nippon Paper Industries has established a variety of committees that cover such fields as the operations of labor and management agreements, and staffing adjustments. Labor-management agreements provide the basis for a variety of initiatives, as well as efforts to improve the workplace environment. On the top of these endeavors, regular central meetings of both sides’ leaders provide a forum to discuss diverse issues including corporate management and working conditions.

At Nippon Paper Industries, there are 4,766 labor union members (as of March 31, 2017). Workplaces are union shops and all of the employees covered by collective bargaining agreements are union members.

- Discussions of working conditions

Major changes to working conditions, such as alterations to personnel systems and personnel downsizing, are in principle implemented on the basis of prior discussions between labor and management. Nippon Paper Group companies do not unilaterally impose changes on employees.

Routine communication is critical for gaining employee understanding of company actions. The Group strives to engage in dialog with employees and labor union to provide such information as financial results.
Responsibility to Communities

As a comprehensive biomass company creating new products and growing its businesses, the Nippon Paper Group manages broad expanses of forests and owns large-scale production sites, so it has significant impacts on local communities and the people who live and work in them. Coexistence with these communities is critical to our own continued existence.

Policy and Management

The Nippon Paper Group engages in a variety of social contribution activities to garner the trust of and remain close to local residents.

**Basic Stance**

Coexisting with local communities, contributing to the advancement of society as a whole

As one of its members, the Nippon Paper Group aims to contribute to society as a whole. While continuing to provide needed products, we would like to play a useful role in protection of the global environment and in the advancement of culture and local communities. We are confident that building a consistent track record along those lines will earn the trust of society and allow us to continue our business activities in coexistence with local communities.

The initiatives we engage in, both inside and outside Japan, include cleanups of the areas around our mills and plants, support for vocational training in afforestation areas, and other locally focused activities; and operation of the School of Friendship for Forests and Paper, mill tours, and other activities making use of forests and other Group resources.

**Philosophy and Principles for Social Contribution Activities**

(established on April 1, 2004)

**Philosophy**

As a member of society, we shall proudly promote activities that contribute to social development.

**Principles**

1. We shall pursue activities that contribute to cultural heritage and development.
2. We shall pursue activities that contribute to conservation and improvement of the environment.
3. We shall pursue activities that contribute to the development of communities.

**Specific activity themes**

- Increase the community involvement of Group company mills and overseas affiliates.
- Promote activities that effectively utilize the resources and expertise of each Group company.
- Promote corporate citizenship activities in which our employees play an active role.
- Effectively use the company-owned forests in Japan (about 90,000 hectares).
- Employ effective PR inside and outside the Group.

**Structure for promoting social contribution activities**

The CSR Division takes the lead in promoting Group-wide social contribution activities. Each Group company appoints a person responsible for overseeing social contribution activities. Each responsible person develops a thorough understanding of social contribution activities undertaken to date, and works to upgrade and expand their content and details.

**The Nippon Paper Group’s principal social contribution activities**

Employment Support

**Case**

Sponsoring workshops in line with local desires (Brazil, AMCEL S.A.)

AMCEL, which holds expansive land, strives to maintain harmonious relationships and to further dialogue with local residents. As part of that effort, it asked local communities what work- or daily-life-related topics they would like to learn about, and in 2014 began to host workshops based on the responses received.

In fiscal 2016, workshops were held on filtering water for drinking, baking bread, eating a healthy diet, farming fish, making traditional pottery, and knitting. Led by AMCEL-invited experts, these workshops took place in five areas, Amapá, Santana, Ferreira Gomes, Itaubal, and Tartarugalzinho, and lasted 3-6 days each. Participants, who numbered over 600 in total, indicated that they were very pleased with the workshops and felt that what they learned would be useful in daily life.

Respect for Indigenous People

**Case**

Making wild herb habitat available to indigenous people (Chile, Volterra S.A.)

The Mapuche are indigenous people who have inhabited southern Chile since well before the arrival of Europeans and maintained their own distinct traditions and culture. In recent years, availability of native wild herbs the Mapuche value for medicinal purposes has declined with the development of land for agriculture, housing, and other purposes.

Volterra, as part of its preservation activities on company-owned land, is protecting habitat for the scarce herbs and has made it available for their use.

Advancing Science and Technology

**Case**

Supporting the Fujihara Foundation of Science (Nippon Paper Industries Co., Ltd.)

Considered the “Nobel Prize of Japan,” the Fujihara Award, presented by the Fujihara Foundation of Science, a public interest incorporated association, recognizes outstanding contributions to science and technology by Japanese scientists. Nippon Paper Industries lends financial support to the Foundation to promote science and technology.

At the 58th Fujihara Awards presentation ceremony, held in June 2017, Dr. Susumu Kitagawa, Deputy Director-General and Distinguished Professor at the Kyoto University Institute for Advanced Study, and Dr. Akira Isogai, a Professor at the University of Tokyo Graduate School of Agricultural and Life Sciences, were each presented with a certificate and gold medal, together with 10 million yen.

Environmental Protection Activities

**Case**

Cleaning up the Suikawa River (Kitakami Paper Co., Ltd.)

In fiscal 2004, Kitakami Paper Co., Ltd. embarked on activities aimed at cleaning up the riverbed of the Suikawa River, which the company uses to provide water for its operations and dispose of industrial wastewater. These activities take place once or twice a month and involve 20-30 of the company’s employees and employees of affiliated companies. In the past, local residents had experienced problems that originated with wastewater from Kitakami’s mill. In 2001, therefore, the company installed oxygen-activated sludge treatment facilities to stabilize water quality, and, in 2002, it entered into an environmental protection agreement with Ichinoseki City, the location of its mill, to strictly manage water quality.

In addition, the company meets annually with an organization of Ichinoseki community leaders focused on looking after the Suikawa River. In these meetings, the company has won praise from the citizens’ group for its sincerity in acting to clean the Suikawa riverbed and control the quality of its wastewater.

**Cleaning the Suikawa riverbed**
In fiscal 2016, 14,374 people (including 6,884 students and teachers) toured Nippon Paper Group facilities worldwide.

In fiscal 2016, Nippon Paper Industries Co., Ltd. became an official supporter of the Pink Ribbon Campaign. The campaign, an endeavor aimed at raising breast-cancer awareness, is a project of J. POSH (Japan Pink-Ribbon of Smile and Happiness campaign), a Japanese NPO.

To support the campaign, the Company launched a new brand of copier paper - Pink Ribbon PPC. Products sold under this brand include a pink ribbon, the symbol of breast-cancer awareness, on their packaging as a means of helping to boost recognition of the Pink Ribbon Campaign. Furthermore, the Company is donating a portion of the sales of Pink Ribbon PPC copier paper to J.POSH. The Company is proud to have its copier paper - one of its longest-selling products – play a role in enhancing recognition of the Pink Ribbon Campaign.

Since fiscal 2005, the Tokyo metropolitan government has held “Work Work Week Tokyo,” an annual event that allows junior high school students to experience a workplace. This is an opportunity for every public junior high school student in Tokyo to take up to a five-day leave from school to experience a workplace - for example, in a local shopping district, manufacturing or other company, or public facility.

Nippon Paper Development Co., Ltd. operates Oji Ekimae Sun Square, a commercial facility in Tokyo’s Kita ward. There, the company welcomes students from local junior high schools that have prearranged their visits, and lets them get a taste of a wide variety of jobs, beginning at the reception counter.

Following each year’s event, polite letters of thanks are received from students. For employees these letters serve as additional motivation to maintain Oji Ekimae Sun Square as a place that is loved by, and continues to contribute to, the local community.

Every spring, the Hokkaido Mill – Asahikawa holds a volunteer event to express appreciation for Asahiyama Zoo in Asahikawa City.

This event, which began in fiscal 2009, is also meant as a gesture of appreciation to the local community. In fiscal 2017, the ninth annual event drew participation from 130 mill and affiliated company employees and their family members.

Asahiyama Zoo is positioned on a slope and its paths become treacherously slick with snow and ice in the winter. The zoo, therefore, spreads sand on the paths to help prevent visitors from slipping and falling. In spring, after the snow and ice have largely melted, volunteers remove the sand for reuse the coming winter. Adults and even small children gather before opening time, perform their work using bamboo brooms and shovels, and finish before the first visitors arrive.

Through this activity, the Hokkaido Mill – Asahikawa is making a valuable, ongoing contribution to the Asahiyama Zoo and local community.

Every year, Nippon Paper Crecia Co. Ltd.’s Kaisei Mill conducts a mill tour and gives a social studies class presentation to help local elementary school students learn about the people who work at the mill and what they do. In its most recent presentation, mill employees, responding to the school’s request for a talk on the efforts and innovation that go into responding to consumer demands, explained how the mill makes products that meet consumer needs. They also let students handle samples of Kleenex® AQUA Veil moisturizing tissues to feel the smooth, supple texture created in response to consumer feedback. After each presentation, all of the students send letters of thanks to the mill. They also recognize mill employees and greet them when they happen to see them. Building this kind of relationship with the local community is valuable and the Kaisei Mill will be proactive in maintaining it.
Corporate Identity Sharing
Conducting activities that enable local residents and employees to physically experience the essence of the Nippon Paper Group

Utilizing Company-Owned Forests

Case

Conducting the annual School of Friendship for Forests and Paper
(Nippon Paper Industries Co., Ltd., Nippon Paper Development Co., Ltd.)

The School of Friendship for Forests and Paper is a hands-on course on the natural environment utilizing forests (approximately 90,000 hectares) owned by Nippon Paper Industries in Japan. With the aim of introducing participants to the beauty and abundance of forests owned by the company, the school is also an opportunity to experience the connection between forests and paper, an essential item for everyday life. This initiative was first launched in the Sugenuma forest of Gunma Prefecture in October 2006.

The common programs that make up the school draw heavily on the knowledge and experience of employees. With Group employees serving as guides, for example, participants enjoy walking through the forest and making paper from twigs they pick up. Participants are gathered from general public with the cooperation of the Japan Philanthropic Association. Since its inception at the Sugenuma company-owned forest, through fiscal 2016, the school has been conducted 21 times, for a total of 700 participants, including parents and children, and students from local schools.

Since 2007, the Toyono School of Friendship for Forests and Paper has been held in Nippon Paper Industries’ Toyono forest in Kumamoto Prefecture. Organized mainly by the company’s Yatsushiro Mill, particular emphasis is placed on activities deeply rooted in the local community. One program of this school incorporates such activities as a mill tour and is one example of how activities are modified to accommodate the needs of each region.

Marunuma Highland Tree-Planting 2017 held (Nippon Paper Industries Co., Ltd.)

Nippon Paper Industries is advancing initiatives aimed at leaving a thriving forest to future generations. As part of that effort, tree-planting activities were begun in the company’s Sugenuma Forest in Gunma Prefecture in May 2010. The sixth iteration of this activity—the Marunuma Highland Tree Planting 2017— took place in May 2017. The number of participants—both Nippon Paper Group people and others, mainly from Tokyo—came to about 100 in all.

Under the guidance of staff, participants used transplanting trowels to plant 1,000 seedlings of six types of trees, including Japanese beech and Japanese oak.

Shaping the Future with Trees
### Company Profile

**Trade Name:** Nippon Paper Industries Co., Ltd.

**Incorporation:** August 1, 1949

**Capital:** ¥104.873 billion

**Address:** 4-6 Kandasurugadai, Chiyoda-ku, Tokyo, Japan

**Telephone:** +81-3-6665-1111

Third-Party Comments

A key point for judging the quality of sustainability reporting is the appropriateness of reporting boundaries. In the case of a publicly listed company, reporting boundaries, even for a CSR report, which is a voluntary disclosure, must cover the entire corporate group, in the same way that financial statements are prepared on a consolidated basis. In Japan, where many companies find it difficult to follow this simple, reasonable rule in setting their CSR reporting boundaries, the Nippon Paper Group is a precious example of a company preparing CSR reports on a consolidated basis. The Nippon Paper Group places great emphasis on transparency and its commitment to thorough disclosure is manifested in its extension of the environmental information reporting scope to cover all principal manufacturing sites, including nonconsolidated subsidiaries.

Many points concerning the Nippon Paper Group’s value chain activities also bear special mention. Though it is now common practice for CSR management to include the value chain in the management scope, actual practice is often perfunctory and ineffective. In the case of the Nippon Paper Group, however, the company has continuously undertaken multidimensional assessments of both value-chain impacts of, and issues stemming from, its business activities. For the fiscal year under review, the company also examined connections between these business activities and SDGs. Regarding CSR procurement, a key tool for managing supply chain risk, the Nippon Paper Group collects information through surveys and interviews, but it also goes to great lengths to gather information through other means as well. For example, it uses stratified surveys and confirmation procedures to ensure it does not purchase illegally logged timber, and dispatches employees responsible for procurement to supplier locations to visually confirm that human and labor rights are being protected throughout the supply chain.

One reporting item of special interest for the fiscal year under review is the assessment of water supply risk related to the company’s water intake. Until now, reporting on water management has focused mainly on water quality. Across the globe, however, the crux of the matter when it comes to water risk is the serious impacts industrial users of water can have on local water systems. Environmental management to reduce these impacts, therefore, is critically important. The Nippon Paper Group’s disclosures on this matter, however, provide no insight on conditions at their overseas manufacturing sites, where the risks are greatest. This point bears improvement going forward. Another aspect of the 2017 report that stood out was the company’s use of a 3D, integrated materiality assessment of impacts on stakeholders, sustainability, and business activities. This approach for presenting information is unique and deserves praise.

Looking to the future, two areas in which the company should improve its performance are employment of people with disabilities, a point I have previously cited, and accident-prevention for employees of affiliates and subcontractors. Regarding the former, in particular, the company’s performance is below the legally mandated employment percentage and trending lower year by year. This is a concern especially in light of the phased raising of the legally mandated employment percentage set to begin in April 2018.
