

Sodium Carboxymethylcellulose **SUNROSE® MAC series** For Lithium Ion Battery usage

- **SUNROSE®** (Carboxymethylcellulose: CMC) is an **anionic, water-soluble polymer** derived from a high quality pure natural cellulose.
- **SUNROSE®** is harmless to humans and is a **biodegradable environmental friendly product**.
- **MAC series** is a special grade inside **SUNROSE®** in which it was **minimized the gel particle size**. By minimizing the gel particle size, it can be **reduce significantly incidences such as streak and pinholes** making the coated surface on application a smooth and glossy finish.

Appearance of coated surface
(1% CMC solids water solution, coating thickness: 100 μm)

SUNROSE® Standard grade

SUNROSE® MAC series
